PVA Hygiene Virucidal Detergent Disinfectant Soluble Sachets - Surface Disinfectant Concentrate - Pack of 20

Variant code: 07-DX720

PVA Hygiene Virucidal Detergent Disinfectant Soluble Sachets are a **multipurpose virucidal detergent disinfectant solution** designed for use on hard floors and general surfaces in professional cleaning environments. Manufactured by PVA Hygiene, a supplier focused on structured chemical systems and compliant hygiene solutions, these sachets support accurate dosing, consistent performance and effective infection control across commercial operations.

Each sachet is **pre-measured for controlled dilution**, allowing operatives to prepare ready-to-use solutions quickly and consistently without manual measuring. Designed for use with trigger spray bottles or general surface cleaning systems, the formulation combines detergent cleaning with disinfectant performance. It is **effective against bacteria, yeasts and enveloped viruses, including Coronavirus**, supporting hygiene standards in environments where infection control is critical. The solution is also **effective for up to 7 days**, helping maintain ongoing surface protection between cleaning cycles when used in accordance with manufacturer guidance.

The formulation is **phosphate free and contains biodegradable surfactants**, supporting environmentally responsible cleaning practices. It also **conforms to EN1276, EN14476, EN13697 and Article 95 Biocidal Regulations**, providing assurance of tested and compliant disinfectant performance. The compact sachet format improves storage efficiency and reduces packaging compared to traditional liquid disinfectants while supporting COSHH-compliant handling procedures.

Product Features

- **Pre-measured soluble sachets** for cleaning and disinfecting
- **Multipurpose virucidal detergent disinfectant** for floors and surfaces

- Effective against bacteria, yeasts and **enveloped viruses including Coronavirus**
- **Effective for up to 7 days** when used as directed
- **Conforms to EN1276, EN14476, EN13697 and Article 95** regulations
- **Phosphate free with biodegradable surfactants**
- Designed for use with trigger spray bottles and general cleaning systems

Product Benefits

- Ensures consistent dilution and disinfectant performance
- Supports effective infection control in high-risk environments
- Reduces risk of incorrect chemical dosing
- Helps maintain hygiene standards across surfaces and floors
- Supports environmentally responsible cleaning practices
- Improves efficiency in routine and high-frequency cleaning tasks

Technical Characteristics

- Designed to dissolve fully in water before use
- Use with trigger spray bottles or general cleaning systems
- Follow manufacturer dilution and contact time instructions
- Store in a dry environment prior to use
- Avoid exposure to moisture before application
- Dispose of packaging in accordance with local regulations

Applications

PVA Hygiene Virucidal Detergent Disinfectant Soluble Sachets are suitable for use in healthcare, education, hospitality, facilities management and commercial cleaning environments. They are particularly effective for disinfecting hard floors and frequently touched surfaces such as worktops, desks, door handles and equipment. The formulation supports routine cleaning and infection control programmes in high-traffic areas, helping maintain hygiene standards and operational consistency in environments where cleanliness and compliance are essential.
