PVA Hygiene Bathroom Cleaner Screen Printed Empty Trigger Spray Bottle - Washroom Cleaner Bottle - 750ml

Variant code: 14-CE580

PVA Hygiene Bathroom Cleaner Screen Printed Empty Trigger Spray Bottle is a **dedicated washroom cleaner dispensing bottle** designed for use in professional cleaning environments. Manufactured by PVA Hygiene Ltd, this bottle is clearly labelled for bathroom and washroom cleaning applications, supporting safe chemical handling and structured cleaning systems across commercial facilities.

The bottle is **screen printed with "Bathroom Cleaner – All washroom areas"**, providing immediate visual identification and reducing the risk of incorrect chemical use. It is designed for use with concentrated cleaning systems, where **1 sachet produces approximately 750ml of ready-to-use solution**, supporting controlled dilution and consistent application. The integrated trigger spray allows for targeted and even distribution of cleaning solution across surfaces such as sinks, tiles, fixtures and fittings.

Built for repeated use, the bottle supports professional cleaning teams in maintaining organised workflows and compliance with COSHH regulations. Its clear labelling and purpose-specific design make it suitable for colour-coded cleaning systems, helping reduce cross-contamination risks in multi-area environments.

Product Features

- **Screen printed "Bathroom Cleaner" bottle** for clear identification
- Marked for use on **all washroom areas**
- Designed for use with sachet-based dilution systems
- **1 sachet = 750ml ready-to-use solution** guidance printed on bottle
- Trigger spray head for controlled and even application
- Durable construction for repeated commercial use
- Manufactured by **PVA Hygiene Ltd**

Product Benefits

- Reduces risk of chemical misuse through clear labelling
- Supports **COSHH-compliant cleaning systems**
- Enables consistent dilution and application of cleaning solutions
- Improves efficiency in washroom cleaning tasks
- Helps maintain organised and structured cleaning processes
- Supports hygiene control in high-traffic environments

Technical Characteristics

- Supplied empty for use with compatible washroom cleaner concentrates
- Designed for trigger spray application
- Suitable for sachet dosing systems
- Clean and rinse regularly to maintain performance
- Store in designated chemical storage areas
- Follow site-specific cleaning and safety procedures

Applications

PVA Hygiene Bathroom Cleaner Screen Printed Empty Trigger Spray Bottle is intended for use in commercial washrooms across sectors including facilities management, healthcare, education, hospitality and public buildings. It is particularly suited to environments where pre-measured chemical sachets are used to create ready-to-use cleaning solutions. The bottle supports efficient and controlled cleaning of sinks, toilets, tiles and surrounding surfaces, helping maintain hygiene standards and operational consistency in high-use washroom environments.
