PVC Knitwrist - XL - Red

Variant code: 22-A400RERXL

Red PVC Knitwrist Gloves | High-Performance Industrial Protection

Our **best-selling Red PVC Knitwrist Gloves**. Engineered for durability and designed for comfort, these gloves are the industry standard for workers who require a reliable barrier against abrasions, oils, and grease.

Whether you are handling rough materials or working in damp environments, the **fully dipped PVC coating** ensures your hands stay dry and protected, while the soft cotton lining prevents irritation during long shifts.

Key Features & Benefits

- **Superior Abrasion Resistance:** The high-quality PVC coating is built to withstand heavy-duty wear and tear, making it a cost-effective choice for rigorous labour.
- **Fully Dipped Construction:** Provides a complete liquid-proof barrier over the hand, protecting you from spills and splashes.
- **Comfortable Cotton Interlock Lining:** Features a breathable, soft interior that absorbs perspiration and makes the glove easy to pull on and off.
- **Secure Knitwrist Cuff:** The elasticated knitted wrist ensures a snug fit, preventing debris, dust, and liquids from entering the glove.
- **Ergonomic Smooth Finish:** Offers excellent flexibility and tactile sensitivity for handling tools and components with ease.

Ideal Applications

These versatile red work gloves are a staple in various sectors, including:

- **Construction & Scaffolding**
- **Waste Management & Janitorial**
- **Agriculture & Farming**
- **General Maintenance**
- **Assembly & Materials Handling**

Pro-Tips for Longevity & Safety

Tip 1: Always inspect your gloves for punctures or tears before starting a task involving chemicals or liquids.

Tip 2: After use in oily environments, wipe the PVC exterior with a damp cloth to extend the life of the material.

Tip 3: Store in a cool, dry place away from direct sunlight to prevent the PVC from becoming brittle over time.

Frequently Asked Questions (FAQs)

Are these gloves chemical resistant?

While PVC provides excellent protection against oils, greases, and some mild chemicals, we recommend checking a specific chemical breakthrough chart if you are working with harsh solvents or acids.

Can these gloves be washed?

Yes, the cotton lining allows for gentle hand washing. However, they should be air-dried only—avoid mechanical heat which can damage the PVC coating.

What size do I need?

These gloves generally feature a standard "one size fits most" or "Large" fit, designed to accommodate the cotton lining and provide enough room for hand movement.

Technical Specifications

Feature	Specification
Material	Polyvinyl Chloride (PVC)
Lining	100% Cotton Interlock
Cuff Style	Elasticated Knitwrist
