Rational Care Control Tablets - Bucket of 150

Variant code: 04-5600562

Rational Care Control Tablets are **specialist combi oven care tablets** developed to protect compatible Rational cooking equipment against limescale build-up. Formulated with **scale-dissolving ingredients**, these genuine Rational care tablets help prevent mineral deposits from forming inside the cooking cabinet and steam generator, supporting reliable equipment performance and long-term protection.

The highly effective care formulation works as part of the oven's **integrated automatic care programme**, helping protect internal components against the effects of hard water. By actively preventing limescale accumulation, the tablets can reduce the need for **external water softening equipment and time-consuming manual descaling**, helping maintain operational reliability and reduce routine maintenance requirements.

Designed for **Rational iCombi Pro, iCombi Classic and SelfCookingCenter models with Efficient CareControl**, the tablets provide convenient, manufacturer-approved equipment care. Their pre-measured format makes routine maintenance straightforward, while the **bucket of 150 tablets** provides a practical supply for busy commercial kitchens, restaurants, hotels and professional catering facilities.
