Excel FLX Refillable Liquid Soap Dispenser 1L - White

Variant code: BC233FLX

Excel FLX Refillable Liquid Soap Dispenser 1L is a durable and cost-effective hand hygiene solution designed for busy commercial washrooms and public facilities. Featuring a generous **1-litre capacity** and a sleek white finish, this professional dispenser delivers reliable soap dispensing while helping organisations reduce maintenance time and control consumable costs.

Built for high-traffic environments, the Excel FLX dispenser combines robust construction with a practical refillable design, allowing users to purchase liquid soap in bulk rather than relying on cartridge systems. This approach helps reduce packaging waste and lowers ongoing operating costs while maintaining excellent hand hygiene standards. The large 1-litre reservoir minimises refill frequency, making it ideal for locations where handwashing demand is consistently high. Its smooth exterior surfaces are easy to clean and maintain, supporting a hygienic and professional washroom environment.

Designed to complement a wide range of commercial interiors, the dispenser features a modern white finish that integrates seamlessly into offices, schools, healthcare facilities, hospitality venues and public buildings. For organisations looking to reinforce their brand identity, custom logo branding options may also be available upon request.

Product Features
