

Reflex K Plus Kevlar Handling Glove with Latex Covering – Blue/Yellow – Medium

Variant code: 22-G525M

Take your hand protection to the next level with the **Reflex K Plus Kevlar Handling Glove**. Engineered for industries where safety isn't just a preference but a requirement, these gloves combine the legendary strength of DuPont™ Kevlar® with a high-performance crinkle latex coating.

Whether you're handling jagged glass, rough timber, or heavy construction materials, the Reflex K Plus is designed to keep you safe without sacrificing the dexterity you need to get the job done.

Key Features & Benefits

- **Superior Cut Resistance:** Featuring a seamless knitted **Kevlar® liner**, these gloves provide elite protection against cuts, slashes, and abrasions.
- **High-Traction Crinkle Latex:** The palm and fingertips are dipped in a durable, textured latex coating, offering **unbeatable grip** in both wet and dry conditions.
- **All-Day Comfort:** The seamless construction eliminates "seam-on-skin" irritation, while the uncoated back allows for **maximum breathability**, keeping your hands cool and dry during long shifts.
- **Ergonomic Design:** The flexible latex coating mimics the hand's natural movement, significantly **reducing hand fatigue** during repetitive tasks.
- **Secure Fit:** An elasticated knit wrist ensures the gloves stay firmly in place while preventing dust, dirt, and debris from entering.

Technical Specifications

Attribute	Rating / Detail
Material	100% Genuine Kevlar®

Attribute	Rating / Detail
	Liner
Coating	Crinkle Natural Latex (Palm & Fingertips)
Safety Standard	EN 388:2016 (Score: 3X43X)
Abrasion Resistance	Level 3
Cut Resistance	Level 4 / ISO Level C
Tear Resistance	Level 4
Puncture Resistance	Level 3

Ideal Applications

The **Reflex K Plus** is a versatile powerhouse suitable for a wide range of "high-risk" sectors:

- **Glass Manufacturing & Glazing:** Handling sharp panes and off-cuts.
- **Construction & Roofing:** Moving bricks, tiles, and rough building materials.
- **Automotive Industry:** Safe handling of metal components and assembly lines.
- **Logistics & Warehousing:** Heavy-duty package handling and crate moving.
- **Timber & Panel Handling:** Protecting against splinters and jagged edges.

FAQ: Frequently Asked Questions

Q: Are these gloves washable?

A: Yes. You can machine wash them at low temperatures (approx. 40°C) using a mild detergent. Avoid bleach, as it can degrade the Kevlar® fibers. Always air dry; do not tumble dry at high heat.

Q: Can I use these for chemical handling?

A: No. While the latex coating provides a physical barrier, these are designed for **mechanical protection** (cuts/abrasions). They are not rated for liquid chemical immersion.

Q: Do they contain latex?

A: Yes, the palm coating is natural latex. Users with latex allergies should opt for a Nitrile-coated alternative, such as the *Reflex KN Plus*.

Maintenance Hints & Tips

- **Storage:** Store in a cool, dry place away from direct sunlight. UV exposure can weaken both the Kevlar® fibres and the latex coating over time.
- **Inspection:** Always check for holes or thinning in the latex before use. Even a small tear can compromise the safety rating.
- **Rotation:** For heavy industrial use, we recommend rotating between two pairs to allow moisture (sweat) to fully evaporate between shifts, extending the life of the liner.
