Canadian Rigger Glove - X Large - Grey

Variant code: 22-A210GRRXL

Canadian Rigger Glove - Grey

Take on the toughest jobs with the **Canadian Rigger Glove**, the industry standard for reliable, heavy-duty hand protection. Specifically designed in a professional **Grey** colourway and a great fit, these gloves are the ultimate choice for tradespeople who demand durability without sacrificing comfort.

Crafted from premium **cow split leather**, these rigger gloves provide a formidable barrier against abrasions, tears, and punctures. Whether you are handling timber on a construction site, clearing brush in landscaping, or managing heavy materials in a warehouse, the reinforced **patch palm** and **vein protection** ensure your hands stay shielded where they are most vulnerable.

Key Features & Benefits

- **Superior Durability:** Made with high-quality cow split leather for long-lasting performance in abrasive environments.
- **Enhanced Safety:** Features integrated **knuckle back protection** and a reinforced **vein patch** to safeguard critical areas.
- **Breathable Comfort:** The lightweight **cotton backing** promotes airflow, reducing sweat and fatigue during extended shifts.
- **Secure Fit:** Designed to provide ample room for dexterity while maintaining a secure, protective grip.
- **Certified Protection:** CE certified and rated for **ANSI Abrasion Level 3**, ensuring they meet rigorous safety standards (EN388).

Attribute	Specification
	Cotton Backing
Colour	Industrial Grey / Striped Canvas
Safety Standard	EN388 (Mechanical Risks), CE Certified
Primary Use	Construction, Mining, Landscaping, General Handling

Frequently Asked Questions (FAQ)

What are Canadian Rigger gloves used for?

These gloves are multi-purpose workhorses. They are ideal for **construction**, **agriculture**, **forestry**, **warehousing**, and **DIY tasks** where you need protection from rough surfaces, splinters, and sharp edges.

Are these gloves suitable for cold weather?

While the leather offers some natural insulation, these are primarily **general-purpose handling gloves**. For extreme sub-zero temperatures, we recommend wearing a thin thermal liner underneath or opting for an insulated rigger variant.

How do I clean my leather rigger gloves?

Leather should not be fully submerged in water. For maintenance, brush off dry dirt with a stiff brush. If they get wet, allow them to air dry naturally away from direct heat sources to prevent the leather from becoming brittle.
