

Rug Doctor Urine Eliminator 500ml

Variant code: 09-RDUE

Rug Doctor Urine Eliminator is designed to remove those nasty stains and odours. The powerful cleaning action is effective against acid-based stains, including vomit and urine.

Directions of Use

When possible, treat the affected area before the stain dries. Some stains such as urine can produce a bleaching effect on carpets and fabrics.

Apply generously to the stained area. For urine or other penetrating stains, be sure to wet the area thoroughly. Do not dab or blot the treatment area – the enzymes require moisture to clean properly.

Place a damp, colour safe towel over the treated area and let it dry naturally. Where possible, leave the area to remain moist overnight. Highly contaminated areas may require a second application.

Once dry, if discolouration remains, simply dampen with water and blot.
