Sebo Automatic XP10 30cm Single Motor Upright Vacuum

Variant code: 16-90547GB

Sebo Automatic XP10 is an **intelligent single-motor upright vacuum cleaner** designed to deliver outstanding cleaning performance across both carpets and hard floors. Featuring Sebo's advanced **automatic height adjustment technology**, the XP10 continuously monitors brush action and automatically adjusts to the optimum cleaning height, ensuring maximum cleaning efficiency regardless of floor type.

Designed for professional cleaning environments, the XP10 combines exceptional manoeuvrability with powerful suction and industry-leading filtration. The low handle weight reduces operator fatigue, while the vacuum's low-profile design allows it to clean effectively under furniture and into difficult-to-reach areas. The machine can even continue operating when laid completely flat, ensuring uninterrupted cleaning performance.

Maintenance is quick and simple thanks to the easy-change brush roller system, while the integrated hose, telescopic wand, crevice tool and upholstery nozzle provide extended cleaning versatility. Combined with Sebo's A-rated filtration system, the XP10 delivers hygienic cleaning performance suitable for commercial, educational, healthcare and hospitality environments.

Product Features

- 30cm cleaning width upright vacuum cleaner
- Advanced automatic height adjustment system
- Single motor design
- A-rated filtration performance
- Low-profile body cleans under furniture
- Operates effectively when laid completely flat
- Integrated hose and telescopic wand
