

Sebo Automatic XP10 30cm Single Motor Upright Vacuum

Variant code: 16-90547GB

The Sebo Automatic XP 10 is the intelligent all-rounder for any type of floor. The brush automatically sets to the optimum height for your floor whether it's hard floor or carpet. The low handle weight assures easy vacuuming and the maintenance of the machine is quick and easy – so you can continue with the cleaning. The telescopic tube and tools are conveniently located and ready for instant use. The Sebo Automatic XP 10 can even work when completely flat. With their low-profile design, they make it easy to clean under furniture. Key Features

- Automatic Adjustment – The sensor controlled automatic height adjustment measures brush action and sets itself to the optimum position, from smooth floor to high pile carpet. On smooth floors a sealing strip behind the brush ensures even fine dust is picked up.
- A-Rated Filtration – The SEBO AUTOMATIC XP is designed to protect the user from harmful dust and also to give the highest levels of filtration. The sealable high-filtration bag ensures hygienic removal of collected dust from the vacuum cleaner. Combined with the pre-motor and post-motor microfilters, the overall filtration is rated “A”.
- Works when flat – The SEBO AUTOMATIC XP works even when it is completely flat. With a low-profile design, it can reach under furniture for all-round cleaning performance.
- Easy Brush Change – When it needs replacing – which is indicated by a red light – or just to clean hair and fibre, the brush roller can be removed just by pressing a button.
- Integrated Hose and Wand – The hose and wand have a combined reach of 2.60m and the built-in crevice and upholstery nozzles are ideal for cleaning furniture and inaccessible areas.
