

Sebo BS460 Commercial Upright Vacuum Cleaner – Twin Motor – 18"/46cm

Variant code: 16-9741GB

Sebo BS460 Commercial Upright Vacuum Cleaner is a heavy-duty professional upright vacuum cleaner engineered for outstanding cleaning performance in large commercial environments. Featuring a powerful twin motor system, durable construction and an extra-wide 18"/46cm cleaning head, the BS460 is designed as a reliable workhorse for contract cleaners, facilities management teams and demanding janitorial applications.

Built specifically for high-volume commercial cleaning, the BS460 combines separate vacuum and brush motors to maximise cleaning efficiency while improving durability and long-term reliability. The extra-wide 46cm cleaning path allows operators to cover large carpeted areas quickly and efficiently, delivering excellent single-pass cleaning performance. A four-level height adjustment system ensures optimum cleaning results across different carpet types, while optional stiffer brushes are available for coarser pile carpets and more demanding cleaning environments.

Designed for professional usability and convenience, the BS460 includes a practical integrated tool set that clips neatly into the rear moulding for easy transport and storage. The pull-out hose and wand system provides quick access for cleaning edges, stairs and hard-to-reach areas without interrupting workflow. Easy-change dust bags and durable commercial-grade construction make the BS460 an efficient and dependable solution for continuous professional cleaning operations.

Product Features

- **Professional commercial upright vacuum cleaner**
- Powerful twin motor cleaning system
- Extra-wide 18"/46cm cleaning head
- Separate vacuum and brush motors for improved durability
- Integrated pull-out wand for edges and stairs

- Four-level carpet height adjustment system
- Integrated tool storage system
- **Suitable for large commercial cleaning areas**

Product Benefits

- Wide cleaning path improves productivity in large areas
- Twin motor system delivers excellent carpet cleaning performance
- Separate motors improve long-term reliability and durability
- Pull-out wand simplifies edge and stair cleaning
- Easy-change bags reduce downtime during maintenance
- Height adjustment improves cleaning performance on different carpets
- Integrated tools improve operational convenience

Technical Characteristics

- **Twin motor upright vacuum technology**
- 18"/46cm professional cleaning width
- Separate brush and vacuum motor system
- 4-level manual carpet height adjustment
- Integrated pull-out hose and wand system
- Commercial-grade heavy-duty construction
- Optional stiffer brushes for coarse pile carpets
- **Easy-access bag replacement system**

Applications
