Sebo Foam Exhaust Filter: For 370/470 - Black

Variant code: 16-1878

Sebo Foam Exhaust Filter is a **genuine replacement exhaust filtration component** designed specifically for **Sebo 370 and 470 series vacuum cleaners**. Manufactured from high-quality foam filtration material, this filter helps capture residual dust particles before exhaust air is released back into the environment, supporting cleaner indoor air and maintaining efficient vacuum performance.

Positioned within the vacuum's exhaust system, the foam filter acts as a final filtration stage, helping to prevent fine dust and airborne particles from being recirculated. Regular replacement ensures optimum airflow, effective filtration performance and continued protection of the vacuum's internal systems.

Manufactured to Sebo's exacting standards, this genuine black foam exhaust filter provides reliable compatibility, simple installation and dependable long-term performance. It is an essential maintenance component for maintaining the efficiency and hygiene standards of Sebo commercial and domestic vacuum cleaners.

Product Features

- Genuine Sebo foam exhaust filter
- Designed for Sebo 370 and 470 vacuum cleaners
- Black foam filtration media
- Captures fine dust and airborne particles
- Final-stage exhaust air filtration
- Helps maintain efficient airflow
- Easy to install and replace
- Durable long-life construction

Product Benefits

- **Improves air quality by filtering exhaust air**
- **Helps prevent fine dust from re-entering the environment**
- **Maintains optimum vacuum cleaner performance**
- Supports cleaner and healthier indoor spaces
- Helps maintain efficient airflow through
