

## Windmill Drain and Grease Trap Maintainer – Biological Drain and Grease Trap Opener – 5L

Variant code: 06-785

**Windmill Drain and Grease Trap Maintainer** is a biological drain maintainer designed to deliver **effective breakdown of grease, fats and organic waste** within drainage systems. As part of the Windmill professional cleaning range, it provides a reliable solution for maintaining free-flowing drains and reducing the risk of blockages in commercial and industrial environments.

The formulation uses **biological and enzyme-based technology** to digest organic matter, including fats, oils and grease (FOG), helping to prevent build-up within pipes and grease traps. By targeting the source of blockages, it supports ongoing system efficiency while also helping to control unpleasant odours commonly associated with drainage systems.

Designed for routine maintenance, the product works over time to keep pipework clean and operational, reducing the need for reactive drain clearing. It is suitable for use in grease traps, drains and waste systems, making it ideal for environments such as kitchens and food preparation areas where grease accumulation is common.

---

### Product Features

- Biological **drain and grease trap maintainer**
- Breaks down **fats, oils, grease and organic waste**
- Helps prevent blockages and build-up
- Provides **ongoing odour control**
- Suitable for drains and grease traps
- Designed for routine maintenance use

---

### Product Benefits

- Maintains free-flowing drainage systems
- Reduces risk of costly blockages
- Controls unpleasant odours at source
- Minimises need for emergency drain clearing
- Supports efficient system performance

- Suitable for regular preventative maintenance

---

## Technical Characteristics

- Biological and enzyme-based formulation
- Designed for use in drainage and waste systems
- Suitable for grease traps and pipework
- Applied neat or diluted depending on application
- Compatible with routine maintenance schedules
- Use in accordance with manufacturer guidelines

---

## Applications

Windmill Drain and Grease Trap Maintainer is suitable for use in **commercial kitchens, restaurants, food processing areas, hospitality venues and industrial facilities**. It is particularly effective in environments where **grease and organic waste accumulation** can lead to blockages and odours. Its biological action makes it ideal for maintaining clean, efficient drainage systems through regular preventative use.

Property	Value
Fragrance	Characteristic
pH	8.5
Colour	Light Yellow
Area of Use	Drain lines and grease traps in kitchens, restaurants and other food premises.
CLP	corrosive
How to Use	Pour directly into the drain or grease tap. Daily dosage is based on the volume of traffic through the food preparation area.
