Selden Maintenance Spray Aerosol - 480ml

Variant code: 06-K033

A blend of penetrating solvents, water dispersing agents and corrosion inhibitors. Instantly displaces all water from damp or wet components. Penetrates deeply to prevent moisture traps. Leaves a protective film to waterproof and guard against corrosion. Lubricates - increases efficiency of working parts.

Pre-spray electrical connections to prevent short circuiting due to water. Can even be used on damp connections to displace problem causing moisture. Penetrates and helps free seized threads and bearings. Protects against further corrosion. Cleans grime from threads and components.

For cleaning applications either spray directly onto surface and allow to penetrate and then wipe off, or for more difficult areas use extension tube and a more directional spray to force away grime . N.B. Do not spray on short circuits where sparking is likely.

Property	Value
Appearance	Aerosol
Fragrance	Characteristic
Volume (ml)	480
Chemical Colour	Colourless
