

Stockinette Roll – Each

Variant code: 12-640

Stockinette Roll is a versatile professional cleaning cloth roll manufactured from high-quality 100% cotton yarn, designed for efficient cleaning, wiping, polishing and buffing applications across commercial, industrial and domestic environments. Also commonly known as mutton cloth, this traditional open-knit cleaning material delivers excellent absorbency, softness and durability for a wide range of cleaning tasks.

Designed for professional cleaners, janitorial teams, facilities management and general household use, this stockinette roll provides reliable lint-minimising performance on delicate and polished surfaces including glass, stainless steel, painted finishes, polished wood and automotive surfaces. The soft non-abrasive cotton construction helps achieve streak-free and scratch-free cleaning results while remaining highly absorbent for spills, polishing compounds, waxes and cleaning solutions.

The continuous roll format allows users to cut the exact cloth size required for each application, reducing waste and improving cost efficiency compared to pre-cut cleaning cloths. Suitable for deep cleaning, polishing, buffing and general wiping tasks, the Stockinette Roll offers a practical and economical cleaning solution for professional and domestic cleaning environments.

Product Features

- **Professional stockinette cleaning roll**
- Manufactured from 100% cotton yarn
- Soft open-knit absorbent construction
- Suitable for cleaning, polishing and buffing
- Non-abrasive streak-free cleaning performance
- Continuous cut-to-size roll design
- Highly absorbent and durable material
- **Supplied individually**

Product Benefits

- Provides excellent absorbency for spills and wiping
- Helps achieve streak-free and scratch-free finishes

- Cut-to-size format reduces waste and improves economy
- Suitable for delicate and polished surfaces
- Ideal for professional and domestic cleaning applications
- Versatile design supports multiple cleaning tasks
- Durable cotton material withstands repeated use

Technical Characteristics

- **100% cotton stockinette cleaning material**
- Open-knit absorbent fabric construction
- Soft non-abrasive cleaning surface
- Continuous roll format for custom sizing
- Suitable for wet and dry cleaning applications
- Compatible with cleaning chemicals, waxes and polishes
- Reusable and durable design
- **Supplied as individual rolls**

Applications

Stockinette Roll is ideal for contract cleaners, janitorial services, automotive detailing, hospitality venues, facilities management teams and domestic cleaning environments requiring versatile absorbent cleaning cloth material. Its soft cotton construction makes it particularly suitable for polishing, buffing, wiping, dusting and general surface cleaning tasks.
