

Suma Nova L6 Machine Detergent Safe Pack – 10L

Variant code: 04-L6

Suma Nova L6 Machine Dishwash Detergent is a powerful, concentrated **alkaline liquid detergent** developed for professional automatic dishwashing in **hard water conditions**. Supplied in a **10L SafePack**, it is suitable for use across a wide range of commercial **single- and multi-tank warewashing machines**.

The concentrated formulation contains effective alkaline components designed to tackle **grease and dried-on food residues**. It also incorporates powerful water-hardness control agents that help prevent the formation of **limescale deposits**, supporting effective warewashing performance where hard water presents an ongoing challenge.

Designed for professional kitchens and commercial warewashing operations, **Suma Nova L6** delivers fast and thorough removal of **grease, starch and protein residues**. Its highly concentrated formulation provides economical use while combining effective soil removal with **limescale control in hard water**.

Product Features

- **Concentrated alkaline liquid detergent** for professional machine dishwashing
- Specially formulated for effective cleaning in **hard water conditions**
- Suitable for commercial **single- and multi-tank warewashing machines**
- Provides fast and thorough removal of **grease, starch and protein residues**
- Effective against **dried-on food residues**
- Contains **water-hardness control agents** to help prevent limescale deposits
- **Highly concentrated formulation** for economical use
- Supplied in a professional **10L SafePack** format
- Physical appearance of a **clear yellow liquid**

Product Benefits

- **Rapidly and thoroughly removes grease, starch, protein and dried-on food residues for effective professional warewashing**
- **Helps prevent limescale deposits in hard water, supporting cleaner ware and dishwashing equipment**
- **Highly concentrated formulation provides greater economy in use within busy commercial operations**
- **Specially formulated for hard water environments** where mineral deposits can compromise washing performance
- **Suitable for a broad range of professional single- and multi-tank dishwashing systems**
- **SafePack format** provides a practical professional packaging and dispensing format for commercial warewashing environments

Technical Characteristics

- **Product Type:** Machine Dishwashing Detergent
- **Form:** Concentrated Alkaline Liquid
- **Pack Size:** 10L
- **Packaging / Dispensing System:** SafePack
- **Water Conditions:** Hard Water
- **Application:** Automatic Commercial Warewashing
- **Machine Compatibility:** Single- & Multi-Tank Warewashing Machines
- **Colour:** Yellow
- **Physical State:** Clear Liquid
- **Neat Solution pH:** Approximately 14
- **Storage Temperature:** 0°C to 40°C
- **Shelf Life:** 720 Days

Applications

Suma Nova L6 Machine Dishwash Detergent is designed for professional automatic warewashing in **commercial kitchens and catering environments operating in hard water conditions**. Suitable for a wide range of **single- and multi-tank warewashing machines**, it is ideal where effective removal of **grease, starch, protein and dried-on food residues** is required alongside reliable **limescale control**. The concentrated **10L SafePack** format makes it particularly appropriate for busy professional dishwashing operations requiring consistent and economical detergent delivery.
