

Sun Screen Board Kit – Wall Board, Dispenser & Sunscreen Cartridge – 1L

Variant code: 10-ADSB-KIT

The Sun Screen Board Kit is a **complete sunscreen application station** designed to encourage regular sun protection in schools, nurseries, playgrounds and outdoor environments. Supplied as a ready-to-install solution, the kit includes a **wall-mounted sunscreen board, Deb Stoko sunscreen dispenser and 1L sunscreen cartridge**, providing everything required to support effective UV protection programmes.

The durable wall board incorporates an **integrated mirror**, helping users apply sunscreen more effectively and ensuring coverage can be checked during application. The system is particularly suitable for educational settings, where the mirror can assist children with independent sunscreen application. For optimal use, the board should be mounted at a suitable height that allows children to comfortably access the dispenser and view the mirror.

The included Deb Stoko sunscreen cartridge provides professional-grade sun protection suitable for regular outdoor use. By positioning the station in a highly visible location, organisations can encourage routine sunscreen use before outdoor activities, helping support wellbeing and sun safety awareness.

Designed for convenience and durability, the complete kit simplifies installation and provides a dedicated sunscreen application point that can be easily incorporated into existing health and safety programmes.

Product Features

- **Complete sunscreen application station**
- Includes **wall board, dispenser and 1L sunscreen cartridge**
- **Integrated mirror** to assist sunscreen application
- Wall-mounted design for convenient access
- Suitable for schools, nurseries and outdoor facilities

- Supports workplace and educational sun safety programmes

Product Benefits

- **Encourages regular sunscreen application** before outdoor activities
- **Supports sun safety and UV protection initiatives**
- **Improves accessibility** to sunscreen at the point of use
- **Helps children apply sunscreen more effectively** using the integrated mirror
- **Provides a complete ready-to-install solution**
- **Promotes healthy outdoor activity** while supporting skin protection

Technical Characteristics

- Includes **1L Deb Stoko sunscreen cartridge**
- Supplied with wall board and compatible dispenser
- Integrated mirror built into board
- Designed for wall-mounted installation
- Suitable for indoor or sheltered outdoor locations
- Mount at an appropriate height for intended users

Applications

The Sun Screen Board Kit is ideal for **schools, nurseries, childcare facilities, sports clubs, holiday camps, playgrounds, parks and outdoor recreational areas** where regular sunscreen application is encouraged. It is particularly effective in environments where children require easy access to sun protection products, helping organisations promote safe outdoor activities and support UV protection awareness programmes.
