Tergsus Glove - M - Blue

Variant code: 22-A250BLUM

Tergsus Glove – Radiant Blue: The Ultimate Fusion of Durability and Dexterity

Elevate your hand safety with the **Tergsus Glove in Blue**, a premium-grade work glove designed for professionals who demand both **high-performance protection** and all-day comfort. Crafted from high-quality **goat grain leather**, this glove is the gold standard for light industrial applications, maintenance, and precision trade work.

The Tergsus series is engineered to be a "breathable powerhouse." By combining the natural toughness of leather with a flexible cotton back, these gloves offer a **superior tactile feel** that synthetic alternatives simply can't match.

Key Features

- **Premium Goat Grain Leather:** Known for its incredible tensile strength and natural lanolin content, goat leather remains soft and supple even after getting wet, providing **long-lasting durability**.
- **Reinforced Fingertips:** Extra layers of protection on high-wear areas ensure these gloves stand up to abrasive surfaces, extending the product's life cycle.
- **Breathable Cotton Back:** The vibrant blue cotton backing allows for **maximum airflow**, keeping your hands cool and reducing sweat buildup during intensive tasks.
- **Hook & Loop Fastening:** The adjustable wrist closure provides a **custom, secure fit** that prevents dust and debris from entering the glove.
- **Enhanced Dexterity:** The thin yet tough grain leather allows for fine motor skills, making it the **best glove for precision handling** and tool operation.

Technical Specifications

Feature	Detail
Primary Material	Premium Goat Grain Leather
Secondary Material	Breathable Cotton (Blue)
Closure Type	High-Tension Hook & Loop (Velcro style)
Application	Light Industrial, Assembly, Gardening, DIY
Colourway	Royal Blue / Natural Cream

Expert Hints & Maintenance Tips

- **The "Break-In" Period:** Goat grain leather is naturally flexible, but wearing them for 30 minutes of light work will allow the leather to mold perfectly to the unique contours of your hand.
- **Keep it Clean:** If the leather gets soiled, wipe it down with a damp cloth. Avoid submerging in water to preserve the natural oils that keep the leather from cracking.
- **Smart Storage:** Use the **hook & loop tabs** to strap the gloves together when not in use. This prevents you from losing a single glove and keeps your kit bag organised.

Frequently Asked Questions (FAQs)

Q: Is goat grain leather better than cowhide?

A: For light industrial work, yes! Goat leather has a higher strength-to-weight ratio than cowhide, meaning it can be thinner (offering better "touch" and dexterity) while remaining just as puncture-resistant.

Q: Can these be used for heavy construction or welding?

A: The Tergsus Glove is optimised for **light industrial applications**, assembly, and general maintenance. For heavy-duty welding or high-heat tasks, we recommend a dedicated gauntlet-style glove.

Q: Does the blue cotton back fade?

Tel: 01626 355177
Email: info@aukhygiene.com

A: We use high-quality, UV-resistant dyes to ensure the **vibrant blue colour** stays professional-looking even after repeated use in outdoor environments.
