

Tork Reflex M4 – Portable Centrefeed Dispenser – Blue – Includes 1 Centrefeed Roll

Variant code: 01-473188

Tork Reflex M4 Portable Centrefeed Dispenser is a professional portable wiping solution designed to improve hygiene, efficiency and mobility in demanding working environments. Developed for use with the **Tork Reflex single sheet centrefeed system**, this dispenser is ideal for hospitality, contract cleaning and other mobile applications where convenient access to wiping paper is essential.

The single-sheet dispensing system helps reduce paper consumption by up to **37%** compared to traditional free-flow centrefeed systems, supporting improved cost control and reduced waste. By allowing users to touch only the paper they use, the dispenser also helps minimise the risk of **cross-contamination**, making it particularly suitable for hygiene-sensitive environments.

Its durable enclosed design protects the paper roll from splashes, dirt and contamination during transport and daily use. The integrated sturdy handle allows the dispenser to be carried easily or attached directly to a cleaning trolley for efficient mobile cleaning operations. A built-in **run-out indicator** helps ensure refills are managed proactively, reducing the risk of running out of paper during use.

Product Features

- **Portable centrefeed dispenser** for mobile cleaning applications
- Compatible with the **Tork Reflex M4 single sheet system**
- Helps reduce paper consumption by up to **37%**
- Single-sheet dispensing supports improved hygiene
- Fully enclosed design protects rolls from dirt and splashes
- Integrated carry handle for portability and trolley attachment
- **Run-out indicator** supports efficient refill management

Product Benefits

- Reduces wiping paper waste and operating costs
- Helps minimise cross-contamination risks
- Supports efficient cleaning workflows in mobile environments
- Protects paper rolls during transport and use
- Improves convenience for contract cleaners and maintenance teams
- Suitable for demanding commercial and industrial environments
- Enhances operational efficiency through controlled dispensing

Technical Characteristics

- Designed for use with **Tork Reflex M4 centrefeed rolls**
- Single-sheet dispensing system for controlled paper usage
- Portable design with integrated carry handle
- Fully enclosed dispenser construction
- Suitable for trolley mounting or standalone carrying
- Robust construction designed for professional environments
- Includes **1 centrefeed roll**

Applications

The **Tork Reflex M4 Portable Centrefeed Dispenser** is suitable for use in **hospitality environments, contract cleaning operations, food preparation areas, workshops and mobile cleaning applications**. It is particularly effective in environments where portability, hygiene and controlled paper consumption are important. Its enclosed and durable design makes it ideal for professional cleaning teams working across multiple locations or demanding environments.

Property	Value
