Windmill - Touch Clean - Antibacterial & Antiviral Clear Foam Soap - 1L

Variant code: 10-815

Windmill - Touch Clean - Antibacterial & Antiviral Clear Foam Soap - 1L: The Ultimate Hygiene Solution

Keeping you hand hygiene standards high with the **Windmill Touch Clean Antibacterial & Antiviral Clear Foam Soap**. This high-performance, fragrance-free formula from AUK Hygiene delivers superior cleanliness and protection in a luxurious foaming format, making it the ideal choice for any environment where hygiene is paramount, especially **food preparation areas**, **healthcare settings**, and **busy workplaces**.

Key Features:

Feature	Description
Advanced Protection	Dual-action formula proven to be both **antibacterial** and **antiviral**.
Luxurious Foam	Creates a rich, silky lather for thorough cleaning and easy spread over the hands.
Gentle & Clear Formula	**Fragrance-free** and clear, making it suitable for sensitive skin and compliant with food preparation regulations.
High Capacity	Large **1 Litre cartridge** provides a high number of washes (approx. 1250 shots at 0.8ml per shot), ensuring cost-effectiveness and less frequent refills.
Brand & Compliance	A quality hygiene product from AUK Hygiene's trusted Windmill range.

Why Choose Foam Soap Over Alcohol Hand Sanitiser? (The Competition)

Email: info@aukhygiene.com

While alcohol-based hand sanitiser has its place for quick, on-the-go sanitisation, the **Windmill Touch Clean Clear Foam Soap** offers a more comprehensive and effective solution for daily hand washing, especially when hands are visibly soiled or greasy.

Feature	Windmill Touch Clean Foam Soap	Standard Alcohol Sanitiser
Removal of Dirt & Debris	**Superior** - Soap and water, combined with friction, effectively **wash away dirt, grease, and all types of germs** and chemicals.	**Limited** - Does not remove visible dirt, grease, or sticky residues.
Antiviral Spectrum	**Effective** - Specially formulated to be **antibacterial & antiviral**, suitable for killing a broad spectrum of pathogens.	**Varies** - Generally effective against many viruses, but often **less effective or ineffective** against non-enveloped viruses like Norovirus.
Skin Comfort	**Better** - The foaming formula is designed to be gentle, reducing the likelihood of the dry, chapped skin often associated with repeated use.	**Poor** - High alcohol content (typically 60-95%) **strips natural oils** from the skin, leading to dryness and irritation.
Application	**Full Hand Wash** - Requires the CDC-recommended 20-second scrub with water and rinsing, the gold standard for hygiene.	**Quick Rub** - Offers a fast, waterless method for disinfection when a sink is unavailable.

The Verdict: For ultimate, all-encompassing hygiene in the workplace or kitchen, nothing beats a proper hand wash with **Windmill Touch Clean Foam Soap** and water. Use alcohol sanitiser only when soap and water are not accessible.

Frequently Asked Questions (FAQs)

Q1: Is this soap safe for use in food environments?
A: Yes, the **Windmill Touch Clean Clear Foam Soap** is **fragrance-free** and clear, which makes it ideal for use in all food preparation and handling areas. It helps ensure there is no residual scent or colour that could taint food products.

Q2: Does this product require a specific dispenser?
A: Yes, this is a 1 Litre cartridge refill designed specifically for use with the appropriate AUK Hygiene Windmill branded dispenser for the Touch Clean range. Using the correct dispenser ensures proper dosing and a sealed, hygienic system.

Q3: What makes foam soap more economical than liquid soap?
A: Foam soap dispensers inject air into the liquid soap to create a rich lather, meaning a much smaller volume of product (approximately 0.8ml per shot) is dispensed compared to liquid soap. This dramatically increases the number of washes per cartridge, making it very cost-effective.

Q4: Is the soap genuinely clear and unperfumed?
A: Absolutely. The product description "Clear Foam Soap" indicates that the soap is dye-free and fragrance-free (unperfumed), making it suitable for users with sensitivities and for use in regulated environments.

Q5: Is this product effective against all germs and viruses?
A: The formula is designed to be Antibacterial & Antiviral against a broad spectrum of pathogens. While no product can guarantee 100% effectiveness against every single microbe, when used according to proper handwashing technique (scrubbing for at least 20 seconds and rinsing thoroughly), it provides a high level of protection, superior to many standard soaps.

Buy the Windmill Touch Clean Antibacterial & Antiviral Clear Foam Soap 1L today for a clean, safe, and cost-effective hand hygiene solution.

A foaming antibacterial hand soap suitable for environments where hygiene is essential, fragrance free so suitable for use in all areas including food preparation.
