# Windmill - Touch Clean - Perfumed Foaming Hand Soap - 1L

**Variant code: 10-817**

## Windmill - Touch Clean - Perfumed Foaming Hand Soap - 1L: The Luxurious Upgrade Your Washroom Deserves

Transform routine handwashing into a refreshing, high-end experience with **Windmill - Touch Clean - Perfumed Foaming Hand Soap - 1L** from AUK Hygiene. This is more than just soap; it's a commitment to superior hygiene, exceptional user comfort, and a subtle, inviting fragrance that elevates any commercial or office washroom.

### Clean Hands, Clear Conscience

Experience the luxury of our rich, creamy lather and a delightful, invigorating fragrance (Source 1.1: fruity fragrance). Designed for high-traffic environments, this 1-litre refill cartridge delivers approximately **1250 doses** (based on 0.8ml per shot), offering outstanding cost-in-use and long-lasting performance.

- **1L Cartridge Format:** Quick, hygienic, and mess-free refilling in your compatible foaming soap dispenser.
- **Luxurious Foaming Action:** Creates a rich, stable lather for an enjoyable and thorough clean.
- **Pleasantly Perfumed:** Leaves a fresh, subtle fragrance on the hands, enhancing the user experience.
- **Mild & Gentle Formula:** Suitable for everyday, frequent use without drying out the skin. Ideal for offices, hotels, schools, and commercial premises (Source 1.1).
- **High-Volume & Cost-Effective:** The concentrated foaming formula provides more washes per litre than traditional liquid soaps.

## The Case for Proper Handwashing: Why Choose Soap over Alcohol Sanitiser?

While alcohol hand sanitiser (like the 73% Alcohol variant by Windmill - Touch Sanitise) serves an essential purpose for instant, on-the-go germ reduction, it is **not a substitute for washing hands with soap and water** when hands are visibly soiled or when the facilities are available.

| Feature | Windmill Foaming Hand Soap (Soap & Water) | Standard Alcohol Sanitiser |
|---|---|---|
| **Primary Action** | **Removes** germs, dirt, and organic matter from the skin (Source 2.5). | **Kills** (inactivates) microbes on the skin (Source 2.4). |
| **Effectiveness** | **Superior** for removing all types of grime, including dirt, grease, and chemicals. More effective against *Norovirus* and *C. diff* spores (Source 2.5). | Efficacious for *quickly* reducing bacteria count on non-visibly soiled hands (Source 2.2). |
| **Skin Comfort** | **Gentler** on the skin; less likely to cause irritation or dryness with frequent use (Source 2.1, 2.6). | Can be **drying** and cause cracked skin with very frequent use due to high alcohol content (Source 2.1, 2.6). |
| **Visible Soiling** | **Essential** when hands are visibly dirty or greasy (Source 2.5). | **Ineffective** when hands are heavily soiled (Source 2.5). |
| **Scent** | A pleasant, lasting fruity perfume. | Typically a strong, clinical alcohol odour. |

**Bottom Line:** For complete, comfortable, and effective hygiene in the washroom, the **Windmill - Touch Clean - Perfumed Foaming Hand Soap** combined with running water is the gold standard. Use alcohol-based sanitisers for quick hygiene when a sink is unavailable.

## Frequently Asked Questions (FAQ's)

**Q: What is the primary function of this product?**
**A:** The primary function is to provide a mild,

Tel: 01626 355177
Email: info@aukhygiene.com

perfumed, high-foaming hand soap for effective and enjoyable handwashing in commercial and office environments. It is a skin cleanser.

**Q: What is the capacity and dosage of the product?**
**A:** It is a 1-Litre (1L) cartridge. The dosage is approximately **0.8ml per shot**, providing around 1250 applications per cartridge.

**Q: What is the main benefit of using a foaming hand soap?**
**A:** Foaming soap is highly economical, as the air infusion allows a smaller amount of liquid soap to expand into a larger, richer lather. This provides a better user experience and reduces overall product consumption compared to standard liquid soap.

**Q: What is the fragrance profile?**
**A:** The soap has a pleasant, mild **fruity** fragrance (Source 1.1).

**Q: How does this soap compare to alcohol hand sanitiser?**
**A:** This soap, used with water, physically removes dirt, grease, and a broader spectrum of germs, including tough viruses and spores, which alcohol sanitisers may not remove. It is designed for washing visibly soiled hands and is much gentler on the skin for frequent use. Alcohol sanitiser is best for *inactivation* of microbes on non-visibly soiled hands when water is not available.

**Q: Is this product part of an eco-friendly program?**
**A:** While the foaming soap is an excellent option for commercial use, AUK Hygiene offers a separate **Windmill Refill** program for certain chemicals that involves the return and reuse of 10L containers to eliminate single-use plastics (Source 1.6, 1.7). For refillable solutions, please check AUK Hygiene's full Windmill range.
