

Touchscreen Knit Glove – S/M – Black

Variant code: 22-GL16BKRS/M

Stay Connected, Stay Warm: The Ultimate Black Touchscreen Knit Glove

Don't let the winter chill freeze your social life. Our **Touchscreen Knit Gloves in Classic Black** are the perfect blend of cosy comfort and modern functionality. Designed for the digital native who refuses to sacrifice warmth for a text, these gloves feature specialised conductive fibres integrated directly into the fingertips.

Whether you're commuting to work, hiking a snowy trail, or just waiting for the bus, you can navigate your smartphone, tablet, or GPS with precision—without ever exposing your skin to the biting cold.

Key Features & Benefits

- **Precision Touch Technology:** Engineered with high-quality conductive yarn in the thumb, index, and middle fingers for seamless interaction with all capacitive touchscreen devices.
- **Premium Thermal Knit:** Crafted from a soft, breathable acrylic blend that traps heat while wicking away moisture, ensuring your hands stay dry and toasty.
- **Enhanced Grip & Control:** The palm features subtle, integrated grip patterns to ensure your expensive devices stay securely in your hand, even in slippery conditions.
- **Universal Stretch Fit:** Our high-elasticity weave offers a "one size fits most" snug fit that retains its shape over time, providing a sleek, non-bulky silhouette.
- **Timeless Aesthetic:** The deep, carbon-black finish complements any winter wardrobe, from professional overcoats to casual puffer jackets.

Technical Specifications

Feature	Details
Material	95% Soft-Brush Acrylic, 5% Spandex/Conductive Fibre
Colour	Midnight Black
Compatibility	iPhone, Android, iPads, ATMs, and Car Nav Systems
Care Instructions	Hand wash cold; Lay flat to dry
Size	Unisex / Universal Stretch

Pro-Tips for the Best Experience

- **The "Snug" Secret:** For the best touchscreen sensitivity, ensure the tips of your fingers are pushed firmly into the ends of the glove. Any "dead space" at the fingertip can reduce the conductive connection.
- **Keep 'em Clean:** Natural oils from your skin and dirt can build up on the conductive fibers over time. A gentle hand wash every few weeks keeps the "touch" feature working like new.
- **Layering:** On sub-zero days, these make excellent **liner gloves**. Wear them under heavy waterproof mittens so you can briefly slide the mittens off to take a photo without freezing.

Frequently Asked Questions (FAQ)

Q: Will these gloves scratch my phone screen?

A: Not at all. The conductive fibres are woven from soft, non-abrasive materials designed specifically to be gentle on glass screens and screen protectors.

Q: Do they work with tempered glass screen protectors?

A: Yes! The high-sensitivity yarn is designed to work through standard tempered glass and plastic film protectors.

Q: Are these gloves waterproof? **A:** These are knit thermal gloves designed for breathability and warmth. While they can handle a light dusting of snow, they are not intended for heavy rain or immersion in water.

Q: Can I use them on ATMs or grocery store kiosks? A: Absolutely. They work on any capacitive touch surface, including digital kiosks, gas station pumps, and tablets.

Why Choose Our Touchscreen Gloves?

In the age of AI-driven convenience and instant communication, your gear should work as hard as your tech does. Our black knit gloves are more than just an accessory – they are an essential tool for the modern winter.
