

Trawlmaster 30cm Gauntlet – L – Blue

Variant code: 22-A880BLUL

Trawlmaster 30cm Gauntlet – Blue: Professional Grade Protection

When the conditions are grueling and the stakes are high, the **Trawlmaster 30cm Gauntlet** stands as the industry standard for hand protection. Engineered specifically for the demanding environments of commercial fishing, oil and gas, and heavy-duty chemical handling, this vibrant blue gauntlet combines **superior grip** with **uncompromising durability**.

Crafted from a high-quality, heavy-duty PVC coating, the Trawlmaster is designed to remain flexible even in sub-zero temperatures. The 30cm length provides extended wrist and forearm protection, ensuring that splashes, debris, and abrasions stay far away from your skin.

Key Features & Benefits

- **Sandy Grit Finish:** The palm and fingers feature a specialised textured "sand" grip, providing **maximum traction** even when handling wet, oily, or frozen surfaces.
- **Cold-Weather Flexibility:** Unlike standard PVC gloves that stiffen in the cold, the Trawlmaster stays supple, reducing hand fatigue during long shifts.
- **Chemical & Oil Resistance:** Built to withstand hydrocarbons, fats, and a wide array of industrial chemicals, making it a versatile tool for more than just the deck of a boat.
- **Soft Cotton Liner:** The interior is bonded with a comfortable cotton jersey liner that absorbs perspiration and makes the gauntlet easy to pull on and off.
- **30cm Gauntlet Cuff:** Extra length offers a protective seal against sleeve ingress, keeping your arms dry and safe from environmental hazards.

Technical Specifications

Feature	Specification
Material	Heavy-duty PVC
Lining	100% Cotton Jersey
Colour	High-Visibility Blue
Length	30cm (12 inches)
Grip Pattern	Rough Sandy Grain
Resistance	Oils, Chemicals, Abrasion, Cold

Frequently Asked Questions (FAQ)

Are these gloves waterproof?

Yes, the Trawlmaster 30cm Gauntlet is **100% waterproof** up to the cuff. The seamless PVC coating ensures no liquid penetration.

Can I use these for food processing?

Absolutely. These gloves are widely used in the fish processing industry and are resistant to animal fats and oils.

How do I clean them?

Rinse the exterior with fresh water after use to remove salt or chemicals. If the interior becomes damp, hang them in a well-ventilated area away from direct heat sources to dry.

What size should I choose?

The Trawlmaster is designed with a generous fit to allow for the cotton liner. If you are between sizes, we recommend sizing up if you plan to wear a thermal thin-liner glove underneath for extreme arctic conditions.

Pro-Hints for Longevity

- **Avoid Direct Heat:** Never dry your gauntlets on a radiator. High direct heat can "bake" the PVC, leading to cracking and reduced lifespan.
- **Storage:** Store them flat or hanging by the cuff. Folding them tightly can create stress points in the PVC over time.
- **Double Up:** For work in extreme sub-zero environments, pair these with a **thermal rig liner**. The 30cm cuff provides ample room to tuck in your thermal layers.

Why Choose Trawlmaster?

The Trawlmaster Blue Gauntlet is more than just a glove; it's a piece of safety equipment trusted by maritime professionals globally. Whether you are hauling nets, degreasing machinery, or managing cold-storage logistics, its **abrasion-resistant** shell and **ergonomic design** ensure you get the job done safely.
