

## Truvox Multiwash 340 Pro Scrubber Dryer

**Variant code: 16-MWPRO340**

The new and updated Multiwash machine scrubs and cleans floors leaving minimal water behind, allowing them to dry quickly.

A very easy to use machine that will give you exceptional results on almost every floor type, including safety flooring, wood-effect flooring, patterned flooring, smooth polished floors as well as entrance mats and carpets.

The machine uses a simple counter rotating brush motion that effectively scrubs the floor and flicks the dirt onto a central drum. The central drum collects the dirt and water into the recovery tank.

### What's New With the New Multiwash?

- Increased brush diameter and improved motor gives 12% more scrubbing power providing an even better cleaning performance
- Improved aesthetics and ergonomic design
- A durable, no-marking, hard shell for protection of your machine and surroundings
- Increased use of engineering plastics eliminating any corrosion
- One simple push button to dispense cleaning solution
- Handle is easier to assemble to the base
- Improved tank connection
- Improved quick disconnect solution system
- Optional 7 litre tank for greater productivity
- All models come with pump as standard
- Fully enclosed spray nozzle for improved aesthetic and greater protection when cleaning under low level items.
- Feature added to prevent the recovery tank lid touching the drum, especially if using it for carpet encapsulation.

| Property    | Value |
|-------------|-------|
| Length (mm) | 390   |

| Property                          | Value                  |
|-----------------------------------|------------------------|
| Warranty (Years)                  | 1                      |
| Weight (kg)                       | 26.5                   |
| Width (mm)                        | 450                    |
| Height (mm)                       | 1110                   |
| Accessories Included with Machine | Standard Black Brushes |
| Motor Wattage (W)                 | 950(Motor)/26(Pump)    |
| Voltage                           | 230                    |
| Brush Width (mm)                  | 340                    |
| Noise Level (dB)                  | 69                     |
| Brush Pressure (g/cm2)            | 190                    |
| Brush Speed (rpm)                 | 650                    |
| Vacuum Width (mm)                 | 340                    |
| Performance (m2 per Hour)         | 350                    |
| Solution Tank Capacity (L)        | 4                      |
| Recovery Tank Capacity (L)        | 2                      |
