

Truvox Upholstery Kit: For Hydromist Compact 250 (Includes Bag, Hose & Upholstery Tool)

Variant code: 16-0534060000

Truvox Upholstery Kit is a **dedicated upholstery cleaning accessory kit** designed specifically for use with the **Truvox Hydromist Compact 250 carpet and upholstery extractor**. Supplied complete with a hose assembly, upholstery tool and storage bag, this kit expands the capabilities of the Hydromist Compact 250, allowing operators to clean upholstered furniture, soft furnishings, vehicle interiors and other fabric-covered surfaces with professional results.

Designed to deliver precise extraction cleaning, the upholstery tool applies cleaning solution directly into fabric fibres before extracting dirt, stains and moisture in a single operation. This helps restore the appearance of upholstery while reducing drying times and improving overall cleaning efficiency.

The flexible hose assembly provides excellent reach and manoeuvrability when cleaning chairs, sofas, office seating, vehicle upholstery and other hard-to-access fabric surfaces. The included storage bag helps keep all components organised and protected when not in use, making transportation and storage simple and convenient.

Manufactured to work seamlessly with the Truvox Hydromist Compact 250, this genuine accessory kit provides a practical solution for professional cleaners, facilities managers, hospitality venues and contract cleaning companies looking to extend the versatility of their extraction cleaning equipment.
