# Ultra High Speed Thermal Floor Pad - 15" - Beige

**Variant code: 03-S15BE**

The **Ultra High Speed Thermal Floor Pad - 15" - Beige** is a professional floor polishing pad designed for **high-speed burnishing, thermal buffing and floor shine maintenance**. Its beige polishing grade is intended to help enhance the appearance of suitable finished hard floors, making it a practical choice for commercial floor care applications where a smooth, glossy surface is required.

Designed for use with **compatible ultra-high-speed floor burnishing machines**, the pad uses the friction generated during polishing to support the burnishing of suitable floor finishes. This **thermal polishing action** helps improve surface gloss and maintain the appearance of previously treated floors. It is intended for floor finishing and maintenance rather than aggressive scrubbing or the removal of existing floor coatings.

With a **15" (381mm) diameter**, the beige thermal floor pad is suitable for appropriately sized professional burnishing equipment. It can be incorporated into regular floor maintenance programmes to help preserve floor appearance in commercial and public environments. For best results, the pad should be used on a clean, compatible floor finish, following the flooring and machine manufacturers' recommendations.

## Product Features

- **Ultra-high-speed thermal floor pad** for professional floor burnishing
- **15" (381mm) diameter** for compatible floor polishing equipment
- **Beige polishing grade** for floor shine maintenance
- Designed for **thermal burnishing and high-speed buffing**
- Helps **enhance and maintain surface gloss** on suitable finished floors
- Suitable for **dry polishing applications** where permitted by the floor finish
- Designed for use with **compatible ultra-high-speed floor burnishers**
- Supports **routine floor appearance**

**maintenance**
- Suitable for **previously finished hard flooring**
- Intended for **polishing and burnishing rather than heavy-duty stripping**
- Suitable for **commercial and professional floor care applications**

## Product Benefits

- **Thermal burnishing action helps enhance surface gloss and maintain the appearance of suitable finished hard floors**
- **Ultra-high-speed polishing capability supports regular floor maintenance in commercial and public environments**
- **15-inch diameter provides a suitable size option for compatible professional floor burnishing machines**
- **Beige polishing grade** supports floor finishing without the aggressive action of stripping pads
- **Dry polishing suitability** provides a practical option for compatible floor maintenance procedures
- **Surface shine enhancement** helps maintain a clean and professional floor appearance
- **Routine burnishing capability** supports ongoing maintenance of previously treated flooring
- **Dedicated polishing application** makes the pad suitable for the finishing stage of floor care
- **Professional machine compatibility** supports use within established commercial cleaning programmes

## Technical Characteristics

- **Product Type:** Ultra High Speed Thermal Floor Pad
- **Pad Grade:** Thermal Burnishing and Polishing
- **Colour:** Beige
- **Pad Diameter:** 15"
- **Metric Diameter:** 381mm
- **Pad Shape:** Round
- **Machine Compatibility:** Appropriately Sized Ultra-High-Speed Floor Burnishing Machines
- **Primary Application:** Thermal Floor Burnishing
- **Additional Applications:** High-Speed Buffing, Floor Polishing and Shine

Maintenance
- **Cleaning Method:** Dry Polishing on Compatible Floor Finishes
- **Suitable Surface:** Compatible Finished Hard Floors
- **Intended Result:** Enhanced Surface Gloss
- **Size Option:** 15" - Beige

## Applications

The **Ultra High Speed Thermal Floor Pad - 15" - Beige** is designed for **high-speed burnishing, thermal polishing and floor shine maintenance** in professional environments such as **offices, hotels, schools, hospitals, shopping centres, retail premises and public buildings**. It is particularly suitable for maintaining the appearance of compatible finished hard floors where a polished, glossy surface is required. When fitted to an appropriately sized **ultra-high-speed floor burnishing machine**, the pad can be used as part of a regular polishing programme or following suitable floor cleaning procedures. Before use, remove loose dirt and debris, confirm that the floor finish is suitable for thermal burnishing, and follow the equipment and flooring manufacturers' instructions to avoid excessive friction or damage to the surface.
