Smart Mop Microfibre Mop Kit - Includes Handle, Frame & Mop Head - Green

Variant code: 14-SMK40G

An excellent microfibre flat mop kit including a ergonomic extending handle, a folding flat mop holder and a deep pile microfibre mop head. This mop system is used wet and works very well with double mop buckets with a flat mop or roller wringer. The launderable deep pile microfibre is very effective at collecting dirt (especially from safety flooring) and then you can rinse it out in the mop bucket to release the dirt.
