# Urnex Cafiza E16 Expresso Machine Cleaner Tablets 1.2g - Pack of 100

**Variant code: 04-CW262**

**Urnex Cafiza E16 Espresso Machine Cleaner Tablets** are **professional-grade cleaning tablets** designed to remove coffee oils, grounds and stubborn residues from compatible espresso machines. Their powerful cleaning formulation targets build-up in **group heads, valves and coffee delivery lines**, helping maintain clean brewing components and support the consistent extraction of great-tasting espresso.

Over time, accumulated coffee oils and residues can affect **coffee flavour, extraction quality and machine performance**. Cafiza E16 tablets help break down these deposits, reducing the risk of bitter or stale flavours caused by contaminated brewing components. Suitable for compatible **traditional and automatic espresso machines**, the tablets support effective routine cleaning and help maintain equipment in busy commercial and domestic coffee environments.

Each tablet weighs **1.2g and measures 12mm in diameter**, providing a convenient, pre-measured dose that eliminates the need to measure cleaning powder. Designed for use in compatible automatic cleaning programmes or traditional espresso machine backflushing procedures, the tablets simplify regular equipment maintenance. Supplied in a **jar of 100 tablets**, they provide a practical, economical cleaning solution for cafés, restaurants, coffee shops, offices and home espresso enthusiasts.

## Product Features

- **Professional espresso machine cleaning tablets** from Urnex
