V-Air® SOLID Evolution - 6 Refills - Marine Musk

Variant code: 06-VMM

V-Air® SOLID Evolution Passive Air Freshener Refill - Pack of 6 is an innovative **non-aerosol air freshener refill** designed to provide continuous, long-lasting fragrance in commercial washrooms, offices and shared indoor spaces. Featuring advanced **multi-phasing air freshener technology**, the refill combines an organic seaweed-derived core with a fragranced outer cartridge to deliver a consistent scent throughout its lifespan. Operating entirely through **natural airflow**, it provides an effective passive air freshening solution without batteries, liquids or aerosol propellants.

At the centre of each refill is an **organic carrageenan gel core**, derived from red seaweed and combined with an outer fragrance-containing EVA structure. This innovative **dual-component design** allows fragrance to release at different rates, helping maintain a balanced and consistent scent for **up to 60 days**. The advanced multi-phasing system incorporates **sub-micron fragrance technology** to support effective fragrance dispersion, while the specially designed slatted cartridge allows air to circulate around the refill and carry fragrance into the surrounding environment.

Manufactured using **recyclable EVA material**, the lightweight refill provides a practical alternative to conventional aerosol air freshening systems. It requires **no batteries, electrical connection, liquid refills or harmful propellants**, helping simplify servicing and reduce the need for powered dispensing equipment. Designed for use with **compatible V-Air® passive air freshener dispensers**, each refill is easy to install and replace as part of a regular maintenance programme. Supplied in a convenient **pack of 6**, the range is available in multiple fragrance options to suit different environments and preferences.

Product Features

- **Advanced multi-phasing fragrance technology** for consistent scent delivery
- **Up to 60 days of fragrance** per refill under suitable conditions
- **Passive air freshening system** powered

by natural airflow
- **Organic carrageenan core** derived from natural red seaweed
- **Dual-component design** combines a seaweed-derived gel core and fragranced outer
- **Sub-micron fragrance technology** supports effective scent dispersion
- **Specially slatted cartridge** promotes airflow around the refill
- **Multi-rate fragrance release** helps maintain a consistent scent
- **Non-aerosol formulation** eliminates the need for aerosol propellants
- **No batteries required** for passive operation
- **No electrical power required** for fragrance release
- **No liquid reservoir** to fill or maintain
- **Recyclable EVA cartridge** supports responsible waste management
- **Lightweight refill design** for convenient handling
- **Carbon-assessed product** as part of its environmental design
- **Compatible with suitable V-Air® passive dispensers**
- **Simple replacement process** for routine servicing
- **Suitable for commercial washrooms** and shared indoor environments
- **Available in multiple fragrances** to suit different preferences
- **Pack of 6 refills** for ongoing air care maintenance

Product Benefits

- **Long-lasting fragrance** helps maintain fresh-smelling indoor spaces for up to 60 days
- **Multi-phasing technology** helps prevent noticeable fluctuations in fragrance intensity
- **Organic seaweed-derived core** provides an innovative approach to passive fragrance release
- **Natural airflow operation** eliminates the need for powered fragrance dispensing
- **Battery-free design** reduces ongoing maintenance requirements
- **Non-aerosol technology** avoids the use of pressurised fragrance sprays
- **No liquid refills** helps simplify handling and replacement
- **Slatted cartridge design** supports

effective fragrance circulation
- **Consistent scent delivery** helps create a pleasant and welcoming atmosphere
- **Recyclable EVA construction** provides a more considered material choice
- **Lightweight cartridge** makes installation and servicing straightforward
- **Up to 60-day replacement cycle** helps reduce frequent maintenance visits
- **Multiple fragrance options** provide flexibility across different environments
- **Suitable for busy commercial facilities** requiring reliable passive air freshening
- **Pack of 6** provides a convenient supply for multiple dispensers

Technical Characteristics

- **Product Range:** V-Air® SOLID Evolution
- **Product Type:** Passive Solid Air Freshener Refill
- **Primary Function:** Continuous Indoor Air Freshening
- **Secondary Function:** Fragrance-Based Odour Management
- **Fragrance Technology:** Multi-Phasing
- **Fragrance Delivery:** Passive Diffusion Through Natural Airflow
- **Fragrance Release:** Dual-Rate Release from Core and Outer Structure
- **Advertised Fragrance Life:** Up to 60 Days
- **Core Material:** Carrageenan-Based Organic Gel
- **Core Origin:** Red Seaweed
- **Outer Cartridge Material:** EVA
- **Cartridge Recyclability:** Recyclable Material
- **Cartridge Design:** Slatted Airflow Structure
- **Fragrance Technology:** Sub-Micron Fragrance Delivery
- **Operating Principle:** Natural Air Movement
- **Battery Requirement:** None
- **Electrical Power Requirement:** None
- **Aerosol Propellants:** None
- **Liquid Refill Requirement:** None
- **Solvent-Based Aerosol Dispensing:** Not Required
- **Dispenser Compatibility:** Compatible V-Air® Passive Air Freshener Dispensers
- **Dispenser Required:** Yes, for Intended Dispenser Installation
- **Dispenser Included:** No
- **Refill Format:** Lightweight Solid Cartridge

- **Environmental Assessment:** Carbon-Assessed Product
- **Fragrance Option:** Citrus Mango
- **Fragrance Option:** Marine Musk
- **Fragrance Option:** Bergamot & Sandalwood
- **Fragrance Performance:** Dependent on Airflow and Environmental Conditions
- **Suitable Environment:** Washrooms, Offices and Public Areas
- **Application Method:** Install in Compatible Passive Dispenser
- **Replacement:** According to Fragrance Performance and Maintenance Schedule
- **Pack Quantity:** 6 Refills
- **Packaging Format:** Pack of 6
- **Disinfectant Function:** Not Claimed
- **Storage:** Follow Current Product Packaging Instructions
- **Safety:** Follow Fragrance-Specific Product Label and Safety Data Sheet

Applications

Ideal for **passive air freshening, continuous fragrance delivery and indoor odour management** in commercial washrooms, offices, hotels, restaurants, schools, universities, leisure centres, gyms, changing rooms, reception areas, corridors, shopping centres and public facilities. Designed for use with **compatible V-Air® passive air freshener dispensers**, the innovative refill combines **multi-phasing fragrance technology, an organic seaweed-derived core and a recyclable EVA cartridge** to provide consistent fragrance for up to 60 days. Its **battery-free, non-aerosol operation** makes it particularly suitable for facilities seeking straightforward, low-maintenance air freshening without electrical connections or liquid fragrance reservoirs. Supplied in a **pack of 6 refills**, it provides a practical solution for maintaining multiple dispensers and regular replacement schedules.

Property	Value
Fragrance	Marine Musk
Area of Use	Suitable for washrooms, toilets, offices, reception areas and other public spaces requiring continuous fragrance and odour control.
CLP	irritant
How to Use	Insert the refill into a compatible V-Air® SOLID Evolution dispenser and position in an area with natural airflow. No batteries or aerosols required. Replace after up to 60 days.
