Vileda UltraSpeed Pro Safe Mop Pad - 40cm - Each

Variant code: 15-415

The **Vileda UltraSpeed Pro r-SafeMop Microfibre Mop Pad** is a professional **40cm mop pad** specially developed for the demanding cleaning challenges associated with **safety, structured, textured and rough flooring**. It is particularly suited to areas where conventional mop pads may struggle to provide sufficient scrubbing action, including kitchens, bathrooms, healthcare shower areas and tiled surfaces.

The secret to its high cleaning performance is a unique combination of **abrasive monofilaments embedded into a microfibre cut pile**. The strong monofilaments provide the scrubbing action required to loosen and release **stubborn dirt**, while the microfibre cut pile picks up and removes the released soil from the surface. This combination delivers effective maintenance cleaning while remaining **low friction on high-friction structured floors**.

Designed for demanding professional cleaning environments, the **r-SafeMop** is highly resistant to a wide range of cleaning chemicals, including **chlorine and bleaches**. Its durable construction is **machine washable over 100 times** and contains a minimum of **50% recycled materials**, providing a long-lasting solution for intensive maintenance cleaning of difficult floor surfaces.

Product Features

- **40cm professional microfibre mop pad**
- Designed for the **Vileda UltraSpeed Pro system**
- Specially developed for **safety and structured flooring**
- Unique combination of **abrasive monofilaments and microfibre cut pile**
- **Abrasive monofilaments** scrub the floor surface to release stubborn dirt
- **Microfibre cut pile** picks up and removes released dirt
- Provides a **strong scrubbing effect** for demanding floor surfaces
- Designed to provide **low friction on high-friction structured floors**

- Highly resistant to a wide range of **cleaning chemicals**
- Resistant to **chlorine and bleaches**
- Contains a minimum of **50% recycled materials**
- **Machine washable over 100 times**
- Can provide an alternative to **brushes on tiles and other textured surfaces**
- Supplied as **1 mop pad**

Product Benefits

- **High-performance maintenance cleaning for safety, textured and structured flooring**
- **Extra-strong fibres provide long-lasting durability and a superior scrubbing effect**
- **Abrasive monofilaments loosen stubborn dirt while the microfibre cut pile picks up and removes the released soil**
- Can replace traditional **brushes for tiles and other textured surfaces** in suitable cleaning applications
- Low-friction performance makes cleaning **high-friction safety flooring** easier
- Resistance to **chlorine, bleaches and a wide range of cleaning chemicals** makes it suitable for demanding professional environments
- **Machine washable over 100 times** for repeated professional use
- Minimum **50% recycled material content** supports more resource-conscious professional cleaning

Technical Characteristics

- **Product Type:** Professional Microfibre Safety Floor Mop Pad
- **System Compatibility:** Vileda UltraSpeed Pro
- **Size:** 40cm
- **Cleaning Construction:** Abrasive Monofilaments Embedded into Microfibre Cut Pile
- **Primary Floor Types:** Safety, Structured, Textured, Rough & Profile Flooring
- **Cleaning Action:** Scrubbing & Microfibre Dirt Removal
- **Chemical Resistance:** Resistant to a Wide Range of Cleaning Chemicals
- **Chlorine & Bleach Resistance:** Yes
- **Recycled Material Content:** Minimum 50%
