# Weedol Rapid Root Weed Killer Trigger Spray

**Variant code: 06-602060**

**Weedol Rapid Root Weedkiller Trigger Spray is a** fast-acting systemic weedkiller designed to control unwanted weeds and grasses, including their roots. Combining **glyphosate and pyraflufen-ethyl**, the formulation provides visible results in as little as 24 hours while working through the plant to tackle the roots for effective weed control.

Suitable for targeted weed treatment on **paths, patios, driveways, gravel areas and other approved hard surfaces**, this versatile weedkiller can also be used in specified garden areas. It is particularly useful for controlling unwanted vegetation along fences, around sheds and greenhouses, and near established woody ornamental plants when applied carefully according to the label.

Supplied in a convenient **1L ready-to-use trigger spray bottle**, the product requires no mixing or dilution. The targeted spray application makes it practical for treating individual weeds and affected areas, helping maintain tidy outdoor spaces with minimal preparation.

## Product Features

- **Fast-acting weedkiller** with visible results in as little as 24 hours.
- **Systemic action** works through treated weeds to kill their roots.
- **Dual active ingredients** containing glyphosate and pyraflufen-ethyl.
- **Controls weeds and grasses** in approved outdoor treatment areas.
- **Suitable for hard surfaces** including paths, patios and driveways where permitted by the product label.
- **Ready-to-use formulation** requires no dilution or mixing.
- **Convenient trigger spray** allows targeted application to weed foliage.
- **Fast visible action** combined with longer-term systemic weed control.
- **1L bottle** provides a practical format for garden maintenance.

## Product Benefits

Email: info@aukhygiene.com

- **Effective root control** helps prevent treated weeds from regrowing from surviving roots.
- **Quick visible results** allow users to see the effects of treatment within approximately 24 hours under suitable conditions.
- **Versatile outdoor use** supports weed control across a range of approved garden and hard surface locations.
- **Convenient application** eliminates the need for separate mixing equipment.
- **Targeted treatment** helps concentrate application on unwanted vegetation.
- **Improved outdoor appearance** helps maintain clearer paths, driveways and garden areas.

## Technical Characteristics

- **Brand:** Weedol
- **Product Range:** Rootkill Plus
- **Product Type:** Systemic Weedkiller
- **Product Format:** Ready-to-Use Trigger Spray
- **Capacity:** 1L
- **Active Ingredients:** Glyphosate and Pyraflufen-Ethyl
- **Physical State:** Liquid Suspension
- **Colour:** White to Off-White
- **Relative Density:** 1.065
- **Flash Point:** Above 100°C
- **Action:** Fast-Acting and Systemic
- **Visible Results:** As Little as 24 Hours
- **Complete Weed Control:** May Take Up to 28 Days
- **Dilution:** None Required
- **Application Method:** Direct Spray onto Weed Foliage
- **Intended Use:** Home Garden Weed Control

## Applications

**Area of Use:** Suitable for treating unwanted weeds and grasses on **paths, patios, driveways, gravel areas, along fences and around sheds and greenhouses**, where authorised by the current product label. May also be used in specified garden areas around established woody ornamental plants, provided desirable plants are protected from spray contact.

**How to Use:** Apply during the active growing season, typically **April to November**, on a dry, calm day. Spray weed foliage evenly until lightly

Email: info@aukhygiene.com

wetted, avoiding excessive application and run-off. Visible results may appear within **24 hours**, although complete weed death can take up to **28 days**, depending on weed type and weather conditions. Always follow the current product label for application rates and restrictions.

**Application Considerations:** This is a **non-selective weedkiller** and may damage desirable plants and grasses if contacted by the spray. Avoid spray drift onto lawns, flowers, shrubs and other vegetation that should be retained. Do not apply where rain or surface run-off could carry the product into drains or watercourses. Check the current label before treating hard surfaces or replanting treated areas.

**Safety: Use plant protection products safely.** Always read the label and product information before use. Keep away from children and pets, avoid unnecessary skin and eye contact, and wear suitable protection as directed. Prevent contamination of ponds, drains, waterways and other aquatic environments. Store securely in the original container and dispose of unused product and packaging according to the label and local regulations.
