White De-icing Salt - 25kg

Variant code: 04-410

White De-Icing Salt is a **premium winter gritting and de-icing salt** designed to melt snow and ice while leaving outdoor surfaces cleaner than traditional brown rock salt. Its clean white granular formulation provides effective winter protection with **minimal brown residue**, making it ideal for commercial, industrial and public environments.

Unlike conventional brown rock salt, which can leave muddy deposits after melting, **white de-icing salt** helps maintain a cleaner appearance on pathways, entrances, car parks and other treated surfaces. It can be spread before freezing conditions to help prevent ice formation or applied directly to existing snow and ice to assist melting.

Supplied in convenient **25kg bags**, White De-Icing Salt is available individually or as a **full pallet of 40 x 25kg bags**. The bagged format allows convenient storage, handling and distribution, making it a practical choice for businesses requiring reliable winter maintenance supplies.

Product Features

- **Premium white de-icing salt** for winter gritting
- Helps melt existing snow and ice
- Suitable for preventative gritting before freezing conditions
- **Cleaner alternative to brown rock salt**
- Leaves minimal muddy or brown residue
- Suitable for pathways, entrances, car parks and access roads
- Supplied in convenient **25kg bags**
- Available individually or in full pallet quantities

Product Benefits

- Helps reduce slip hazards during freezing weather
- Supports safer pedestrian and vehicle access
- Leaves treated surfaces cleaner than traditional brown rock salt
- Helps reduce dirt and residue tracked into buildings
- Suitable for preventative and reactive

winter maintenance
- Convenient bagged format for easier handling and storage
- Ideal for high-footfall commercial and public areas

Technical Characteristics

- **Product type:** White de-icing salt
- **Material:** Sodium chloride
- **Colour:** White
- **Form:** Granular salt
- **Bag size:** 25kg nominal
- **Single bag:** 1 x 25kg
- **Full pallet:** 40 x 25kg bags (1,000kg nominal)
- **Application:** Snow and ice melting and preventative gritting
- **Application method:** Manual spreading or compatible salt spreaders
- **Residue:** Minimal brown or muddy deposits
- **Delivery:** Full pallet orders delivered by pallet carrier
- **Storage:** Keep sealed, covered and protected from moisture
- **Precaution:** Avoid excessive application and follow surface and environmental protection guidance

Applications

Ideal for **de-icing and gritting** pathways, entrances, car parks, driveways and access roads at schools, hospitals, hotels and commercial premises. Effectively tackles **snow and ice** while leaving minimal brown residue on treated surfaces.
