

Windmill Aluminium Cleaner & Descaler – 5L

Variant code: 04-286

Windmill Aluminium Cleaner & Descaler is a specialist cleaning solution designed to deliver **effective cleaning, brightening and descaling** of aluminium surfaces and equipment. Developed for professional environments, it ensures reliable performance while maintaining the integrity of aluminium materials.

This formulation is suitable for the **cleaning and brightening of aluminium and its alloys**, restoring appearance by removing tarnishing, oxidation and general soiling. It is also effective for the **descaling of kitchen and industrial equipment**, making it a versatile solution for maintenance tasks.

For use, dilute **1 part product to 5 parts water**, apply to the surface starting from the bottom and agitate with a brush to remove contamination. Rinse thoroughly with clean water after cleaning. For stubborn deposits, contact time may be increased or a stronger concentration used, with care when applying neat product.

Do not allow the product to dry on aluminium surfaces and avoid use on **magnesium alloys or anodised finishes**. Always follow correct usage guidelines and test where necessary. Supplied in a **5L format**, it is suitable for professional and high-use environments.

Product Features

- Aluminium **cleaner and descaler**
- Cleans, brightens and removes tarnishing
- Suitable for **industrial and kitchen equipment**
- Effective on aluminium and its alloys
- Concentrated formulation for controlled dilution
- Designed for professional use

Product Benefits

- Restores appearance of aluminium surfaces
- Removes scale, oxidation and general soiling
- Supports maintenance of equipment and surfaces

- Suitable for a range of cleaning applications
- Provides consistent and reliable results
- Ideal for high-use environments

Technical Characteristics

- Recommended dilution: **1:5 with water**
- Suitable for aluminium and aluminium alloys
- Requires agitation and rinsing after application
- Do not allow product to dry on surfaces
- Do not use on **magnesium alloy or anodised finishes**
- Use in accordance with manufacturer guidelines

Applications

Windmill Aluminium Cleaner & Descaler is suitable for use in **commercial kitchens, industrial environments and maintenance applications**. It is ideal for cleaning and restoring **aluminium equipment, surfaces and components**, as well as descaling kitchen and industrial systems where build-up affects performance and appearance.

Property	Value
Fragrance	Odourless
Volume (L)	5
Dilution	Dilute 1:5 parts water.
pH	1.7
Area of Use	Aluminium and its alloys. Industrial kitchen equipment
CLP	corrosive
How to Use	Brush solution onto surface, starting at the bottom. Agitate surface with a brush. Rinse with water. For stubborn tarnishing increase contact time or use a higher concentrate of product. Use extra care with neat material.
Chemical Colour	Colourless
