Windmill Cream Cleaner - 500ml

Variant code: 06-400

Windmill Cream Cleaner is a mild abrasive surface cleaner designed to deliver **effective removal of stubborn dirt, grease and marks** from a wide range of hard surfaces. As part of the Windmill professional cleaning range, it provides a reliable solution for tackling ingrained soiling while maintaining surface integrity in commercial and domestic environments.

The formulation contains fine abrasives that work to lift and remove tough deposits such as burnt-on food, soap scum and general grime without causing damage to most hard surfaces. It is particularly effective on surfaces where standard liquid cleaners may struggle, offering enhanced cleaning performance while remaining easy to use. The product spreads easily and rinses away cleanly, leaving surfaces fresh and residue-free.

Suitable for use on a variety of surfaces including stainless steel, ceramics, enamel and laminates, Windmill Cream Cleaner offers versatility across multiple cleaning tasks. It is designed for manual application using a cloth or sponge, allowing targeted cleaning of specific areas where deeper cleaning is required.

Product Features

- Mild abrasive **cream cleaner**
- Removes **stubborn dirt, grease and marks**
- Suitable for a range of **hard surfaces**
- Effective on **ingrained and burnt-on residues**
- Easy to apply and rinse off
- Designed for manual cleaning applications

Product Benefits

- Provides deeper cleaning for tough stains
- Maintains cleanliness of high-use surfaces
- Suitable for a wide range of cleaning tasks
- Enhances surface appearance
- Supports efficient cleaning routines
- Delivers consistent and reliable results
