Windmill Eliminator Fogger Kit – 12 Aerosol Sanitising Cans with PPE & Door Signage

Variant code: 06-865KIT

Windmill Eliminator Fogger Kit is an aerosol room sanitising system designed to deliver **rapid, full-space disinfection of air and surfaces** in enclosed environments. As part of the Windmill professional hygiene range, it provides a complete, ready-to-use solution for high-level sanitising where speed and coverage are critical.

Each fogger contains a **high-performance formulation with over 90% alcohol** and conforms to **BS EN 1276, BS EN 1650 and BS EN 14476**, providing bactericidal, virucidal and fungicidal action. Once activated, the aerosol releases a fine sanitising mist that disperses throughout the space, ensuring comprehensive coverage. Within **15 minutes**, surfaces are coated with an anti-bacterial layer while airborne contamination is effectively reduced.

Designed for ease of use, the fogger is placed in the centre of the room and activated with a simple push-down mechanism. Each can treats areas up to **100m³**, making it suitable for vehicles, classrooms, medical areas and offices. After activation, the area should be left for 15 minutes and then ventilated for a further 15 minutes.

Product Features

- Aerosol **room sanitising fogger system**
- Contains **>90% alcohol formulation**
- Conforms to **BS EN 1276, 1650 & 14476**
- Provides **bactericidal, virucidal and fungicidal action**
- Covers areas up to **100m³ per can**
- Leaves an **anti-bacterial layer on surfaces**
- Complete kit with **PPE and door signage**

Product Benefits

- Rapid sanitisation of enclosed spaces
- Ensures thorough coverage of air and surfaces
- Reduces need for manual disinfection
- Ideal for quick turnaround environments
- Supports infection control procedures
