Windmill Endurance - Low Maintenance Floor Cleaner - 5L

Variant code: 03-899

Windmill Endurance is a low maintenance floor cleaner designed to deliver **effective routine cleaning while preserving and enhancing floor finishes**. As part of the Windmill professional floor care range, it is formulated to clean floors without degrading protective coatings, making it ideal for environments where maintaining appearance with minimal upkeep is essential.

The formulation works by removing dirt, light soiling and surface contamination while leaving behind a subtle finish that helps maintain the integrity and appearance of treated floors. It is particularly suited to floors that have been sealed or polished, as it supports ongoing maintenance without stripping or dulling the surface. This makes it an effective solution for extending the life of floor finishes while reducing the need for frequent re-polishing.

Windmill Endurance is suitable for use on a wide range of hard floor surfaces and integrates easily into standard cleaning routines. It can be used with manual mopping systems or mechanical cleaning equipment, providing flexibility across different cleaning environments. The product helps maintain a clean, presentable surface while supporting efficient and consistent maintenance programmes.

Product Features

- Low maintenance **floor cleaner**
- Removes **light dirt and surface soiling**
- Suitable for **treated and polished floors**
- Helps maintain existing floor finishes
- Compatible with manual and machine cleaning
- Designed for routine cleaning applications

Product Benefits

- Extends the life of floor finishes
- Reduces need for frequent re-polishing
- Maintains a clean and consistent floor appearance

- Supports efficient cleaning routines
- Suitable for high-traffic environments
- Helps reduce overall maintenance costs

Technical Characteristics

- Designed for **routine floor maintenance**
- Suitable for use on compatible hard floor surfaces
- Can be diluted depending on application requirements
- Compatible with standard cleaning equipment
- Safe for use on sealed and polished floors
- Use in accordance with manufacturer guidelines

Applications

Windmill Endurance is suitable for use in **commercial, industrial and institutional environments**, including offices, schools, retail spaces and public buildings. It is particularly effective in areas where **low maintenance cleaning programmes** are required to maintain floor appearance with minimal intervention. Its ability to clean while preserving finishes makes it ideal for **high-traffic areas**, ensuring floors remain clean, protected and presentable over time.

Property	Value
Fragrance	Characteristic
Dilution	Use Neat
pH	8.4
Area of Use	For use with non-buff and high speed systems. Always try the chemical in a test area first. For commercial use only.
CLP	irritant
How to Use	Clean and strip the floor, then apply thin, even coats of polish. Let each coat dry (30 minutes) and apply up to 4 coats within 24 hours for best results.
Chemical Colour	Cream
