Windmill Urinal Blocks - Non pDCB Urinal Blocks - 3kg

Variant code: 05-502

Windmill Urinal Blocks are non pDCB urinal blocks designed to deliver **effective odour control and hygiene maintenance** in washroom environments. Manufactured by Windmill, a trusted brand in professional cleaning products, these urinal blocks provide a practical solution for maintaining freshness and cleanliness in urinals without the use of para-dichlorobenzene (pDCB).

Formulated to gradually dissolve during use, the blocks release active ingredients that help to **reduce odours and maintain a clean environment** within urinal systems. Their non pDCB composition makes them a suitable choice for environments where alternative formulations are preferred, while still providing reliable deodorising performance.

Designed for ease of use, the urinal blocks can be placed directly into urinals, where they work continuously to support hygiene and odour control. As they dissolve, they help to reduce the build-up of deposits and contribute to improved cleanliness within the system.

Supplied in a **3kg format**, Windmill Urinal Blocks are suitable for high-usage environments where consistent odour control and cost-effective maintenance are required.

Product Features

- Non pDCB **urinal blocks** for odour control
- Gradually dissolving formulation for continuous action
- Helps maintain **fresh and hygienic washroom conditions**
- Suitable for use in urinals
- **Easy to apply** with no preparation required
- Supplied in bulk format for professional use

Product Benefits

- Provides ongoing **odour control in washroom environments**
- Supports improved hygiene in urinal systems

- Reduces need for frequent manual cleaning
- Offers a **practical and easy-to-use** solution
- Suitable for high-traffic washroom areas
- Helps maintain a pleasant environment for users

Technical Characteristics

- **Non pDCB formulation**
- Designed for placement directly into urinals
- Gradually **dissolves during use**
- Compatible with standard urinal systems
- Supplied in bulk quantity for professional environments
- Use in accordance with manufacturer guidelines

Applications

Windmill Urinal Blocks are suitable for use in **commercial, industrial and institutional washrooms**, including offices, schools, leisure facilities and public buildings. They are particularly effective in **high-traffic washrooms**, where continuous odour control is required to maintain a clean and pleasant environment. Their simple application and long-lasting performance make them an essential solution for routine washroom maintenance.

Property	Value
pH	7
Fragrance	Lemon-like
Area of Use	Urinals
CLP	corrosive
How to Use	Blocks should be evenly spaced and only be replaced with new ones once the current blocks in the urinal have fully dissolved. Before positioning blocks, ensure traps are securely positioned over drains to prevent blocks from falling down.
Chemical Colour	Yellow
Urinals	Place 1 or 2 blocks into urinal channel as required ensuring the water outlet is not obstructed.
Troughs	Place one block every 50 cm. Keep container tightly closed when not in use.
