

Windmill HD Descaler Rapid Periodic Descaler – 1L

Variant code: 05-850

A very strong rapid descaler for periodic limescale removal. A combination of Hydrochloric and Phosphoric acids for outstanding results on even the heaviest scale problems. Ideal for fast and efficient descaling of toilets and some surfaces.

For best results with this descaler, make the toilet/surface slightly wet, apply the descaler sparingly and spread evenly with a brush/scourer, then leave for 5-10 minutes depending on build-up. Use a brush or scourer to agitate then collect slurry and rinse the surface. For heavy scale build-up you may need to re-apply.

WARNING!
DO NOT USE ON STAINLESS STEEL!
DO NOT MIX WITH OTHER CHEMICALS!

Property	Value
Fragrance	Characteristic
Dilution	Use Neat
pH	0.6
Area of Use	Ideal for fast and efficient descaling of toilets and some surfaces.
CLP	corrosive
How to Use	For best results with this descaler, make the toilet/surface slightly wet, apply the descaler sparingly and spread evenly with a brush/scourer, then leave for 5-10 minutes depending on build-up. Use a brush or scourer to agitate then collect slurry
Chemical Colour	Blue
