Windmill Synergy - Biological Toilet and Urinal Cleaner - 1L - Apple Fragrance

Variant code: 05-805

Windmill Synergy - Biological Toilet and Urinal Cleaner - 1L - Apple Fragrance is a high-performance cleaning solution designed to deliver **effective cleaning, deodorising and long-lasting freshness** in washroom environments. As part of the Windmill Synergy biological range, it utilises advanced formulation technology to target odours and organic build-up at source, helping maintain hygienic and fresh facilities.

A mean clean that's green, this eco-conscious formulation combines performance with sustainability. It delivers a **refreshing apple fragrance** while effectively eliminating stubborn toilet odours, improving the overall washroom environment. The viscous formula clings to the bowl surface, allowing extended contact time for more thorough cleaning and enhanced results.

The cleaner is designed to tackle tough deposits including stains and organic residues, while also helping to **prevent the build-up of uric acid crystals**, a common issue in water-saving toilets and urinals. This makes it particularly suitable for maintaining modern washroom systems where reduced water usage can lead to increased residue build-up.

Easy to apply, simply use under the rim and allow up to 30 minutes of contact time before brushing and flushing. Supplied in a **1L format**, it is suitable for regular use in professional and commercial environments requiring consistent cleaning performance.

Product Features

- Biological **toilet and urinal cleaner**
- **Apple fragrance** for a fresh finish
- Viscous formula for extended contact time
- Helps prevent **uric acid crystal build-up**
- Effectively removes stains and grime
- Designed for easy application under the rim

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Eliminates unpleasant odours at source
- Maintains a **fresh and hygienic washroom environment**
- Improves performance in water-saving systems
- Reduces build-up of organic deposits over time
- Simplifies cleaning routines with effective formulation
- Enhances user experience with a pleasant fragrance

Technical Characteristics

- Suitable for **toilets and urinals**
- Designed for **direct application with dwell time**
- Compatible with standard washroom cleaning routines
- Utilises **biological cleaning technology**
- Helps manage organic residue and scaling issues
- Requires use in accordance with manufacturer guidelines

Applications

Windmill Synergy Biological Toilet and Urinal Cleaner is suitable for use in **commercial, industrial and institutional washrooms**, including offices, schools, healthcare environments and public facilities. It is particularly effective in **water-saving toilets and urinals**, where uric acid build-up is more common. Its combination of cleaning, deodorising and preventative action makes it ideal for maintaining clean, fresh and hygienic washroom environments.
