

Windmill Odour Force Lemon – Enzyme Deodoriser – 5L

Variant code: 05-860

Windmill Odour Force Lemon is an enzyme deodoriser designed to deliver **effective odour elimination and cleaning performance** across a wide range of environments. As part of the Windmill professional cleaning range, it uses **enzymatic action** to break down organic soiling and stains, removing odours at source rather than masking them.

This natural and effective odour eliminator targets contamination such as vomit, urine, food waste and other protein-based residues. The formulation works by digesting organic matter, providing **long-lasting odour control** and improved hygiene. Its **powerful citrus scent** delivers immediate freshness, making it ideal for areas affected by strong or persistent odours.

Safe for use on **all types of absorbent surfaces**, including carpets, fabrics and upholstery, the product offers excellent versatility. It may be reapplied as required, including at stronger concentrations or neat in heavily affected areas, without risk of overuse. It is also suitable for use around **sanitary ware, drains, waste pipes and tiled surfaces**, helping to prevent unpleasant odours in washroom and housekeeping environments.

For optimal performance, this product should not be used in conjunction with disinfectants or sanitisers, as these may interfere with the enzyme action. Available **5L format**, it provides flexibility for both targeted applications and high-usage environments.

Product Features

- Enzyme-based deodoriser with **natural odour eliminating action**
 - Breaks down **organic soiling and stains at source**
 - Provides **long-lasting odour control**
 - Suitable for **carpets, fabrics and absorbent surfaces**
 - Can be used **neat or diluted as required**
 - Fresh **citrus fragrance** for immediate results
-

Product Benefits

- Eliminates odours rather than masking them
- Improves hygiene in odour-prone areas
- Suitable for a wide range of cleaning and deodorising tasks
- Flexible application for light or heavy contamination
- Helps maintain fresh and pleasant environments
- Supports efficient and repeatable cleaning routines

Technical Characteristics

- Suitable for **absorbent and porous surfaces**
- Designed for use on **organic and protein-based contamination**
- Utilises **enzyme-based cleaning technology**
- Can be reapplied or used at higher concentration if required
- Do not use with **disinfectants or sanitisers**
- Requires use in accordance with manufacturer guidelines

Applications

Windmill Odour Force Lemon is suitable for use in **commercial, industrial and institutional environments**, including washrooms, care homes, hospitality venues and public facilities. It is particularly effective in areas affected by **organic contamination and persistent odours**, such as carpets, upholstery and waste areas. Its suitability for use around **drains, sanitary ware and tiled surfaces** makes it a versatile solution for maintaining freshness in both washroom and housekeeping environments.

Property	Value
Fragrance	Lemon
pH	7
Volume (L)	5
Dilution	Dilute 5 parts water to 1 part Odour Force, apply directly to the area of soiling. Leave to work, do not rinse.

Property	Value
Area of Use	Odour Control for Carpets, Washrooms and Drains
