Windmill Odour Neutraliser - Bactericidal Fabric Deodoriser - 5L

Variant code: 06-810

Windmill Odour Neutraliser is a bactericidal deodoriser designed to deliver **effective odour control and hygiene performance** in environments where persistent odours are a concern. As part of the Windmill professional cleaning range, it provides a reliable solution for neutralising unpleasant smells while helping to control bacterial build-up.

Developed for compatibility with **extraction cleaning systems**, the product can be added directly into the detergent tank, allowing seamless integration into carpet and upholstery cleaning processes. It provides a **powerful bactericidal action**, making it particularly suitable for care homes, healthcare environments and other institutional settings where hygiene is critical.

The formulation contains a **high level of perfume**, helping to re-odorise furnishings after the removal of odours caused by urine, faeces and vomit. It works within carpet fibres to help prevent bacterial build-up, supporting longer-lasting freshness after cleaning. For more severe odour issues, the product can be diluted with water and used as a pre-spray before extraction cleaning.

Product Features

- Bactericidal **odour neutraliser and deodoriser**
- Compatible with **extraction cleaning systems**
- Can be added directly to detergent tanks
- High perfume content for re-odorising
- Helps prevent **bacterial build-up in fibres**
- Suitable for carpets and soft furnishings

Product Benefits

- Eliminates and neutralises persistent odours
- Enhances results of extraction cleaning processes
- Maintains hygiene in sensitive environments
