Windmill Oven Cleaner - Thick Clinging - 750ml

Variant code: 04-381

Windmill Oven Cleaner is a powerful cleaning solution designed to deliver **fast and effective removal of grease, carbon deposits and baked-on food residues** in professional and domestic kitchen environments. As part of the Windmill professional cleaning range, it is formulated for heavy-duty cleaning where strong performance is required.

This ready-to-use cleaner features a **thick clinging formula**, allowing it to adhere to vertical surfaces for extended contact time and improved cleaning action. It effectively removes **baked-on blood and food residues from ovens and grills**, making it ideal for kitchens, catering environments and food preparation areas where heavy build-up occurs.

For optimum efficiency, warm the oven before switching it off prior to application (do not apply to hot surfaces). Apply an even layer of product to the soiled surface and allow it to dwell according to the level of contamination. After the appropriate contact time, wipe off with a damp cloth and rinse thoroughly with clean water. For stubborn deposits, repeat application may be required.

Do not use on **aluminium or galvanised metal**, and ensure correct handling during use. Supplied in a **750ml format**, it is ideal for convenient application in both professional and smaller-scale cleaning tasks.

Product Features

- Heavy-duty **oven cleaner with clinging formula**
- Clings to **vertical surfaces for improved dwell time**
- Effective on **baked-on grease, blood and food residues**
- Ready-to-use formulation
- Suitable for ovens, grills and cooking equipment
- Designed for deep cleaning applications

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Removes stubborn deposits quickly and effectively
- Improves cleaning efficiency with extended contact time
- Suitable for both professional and domestic use
- Reduces need for excessive scrubbing
- Delivers consistent and reliable cleaning results
- Ideal for regular and deep cleaning tasks

Technical Characteristics

- Ready-to-use cleaning formulation
- Apply to **warm (not hot) surfaces** for best results
- Contact time varies depending on level of soiling
- May require repeat application for heavy deposits
- Do not use on **aluminium or galvanised metal**
- Requires rinsing after use

Applications

Windmill Oven Cleaner is suitable for use in **commercial kitchens, catering environments and domestic kitchens**. It is ideal for cleaning **ovens, grills and cooking surfaces** where grease and food residues build up. Its clinging formulation makes it particularly effective on vertical and difficult-to-reach areas.

Cleaning Guide (Typical Contact Times)

- **Light Grease:** 3 mins (cold) / 1 min (warm)
- **Heavy Grease:** 30 mins (cold) / 5 mins (warm)
- **Baked-on Grease:** 12 hours (cold) / 2 hours (warm)
