# Windmill Oven Cleaner - Think Clinging - 5L

**Variant code: 04-380**

**Windmill Oven Cleaner** is a powerful cleaning solution designed to deliver **fast and effective removal of grease, carbon deposits and baked-on food residues** in professional kitchen environments. As part of the Windmill professional cleaning range, it is formulated for heavy-duty cleaning where strong performance is required.

This effective ready-to-use formulation features a **thick clinging consistency**, allowing it to adhere to vertical surfaces for improved contact time and enhanced cleaning action. It is ideal for use as an oven cleaner and for the removal of **blood, grease and baked-on food products**, making it suitable for kitchens, bakeries, food processing areas and other environments where heavy build-up occurs.

For best results, the product should be applied to a **warm (not hot) oven**, ensuring optimal performance. Apply an even layer to the oven interior and allow it to act according to the level of soiling. After the appropriate contact time, wipe away residue with a cloth and clean water. For heavily soiled areas, a second application may be required.

Due to its highly caustic nature, appropriate precautions must be taken. Always wear **impervious gloves**, do not apply to hot surfaces, and avoid use on **aluminium or galvanised metal**. Supplied in a **5L format**, it is ideal for professional and high-use environments.

## Product Features

- Heavy-duty **oven cleaner with clinging formula**
- Clings to **vertical surfaces for improved performance**
- Effective on **baked-on grease and food residues**
- Ready-to-use formulation
- Suitable for **commercial kitchen environments**
- Designed for deep cleaning applications

## Product Benefits

- Provides powerful removal of stubborn

Tel: 01626 355177
Email: info@aukhygiene.com

grease and deposits
- Improves cleaning efficiency with extended contact time
- Suitable for demanding and high-use environments
- Reduces need for excessive scrubbing
- Delivers consistent and reliable cleaning results
- Ideal for periodic deep cleaning tasks

## Technical Characteristics

- Ready-to-use **caustic cleaning formulation**
- Best used on **warm surfaces (not hot)**
- Contact time varies depending on level of soiling
- May require repeat application for heavy deposits
- Do not use on **aluminium or galvanised metals**
- Requires use of appropriate PPE (gloves)

## Applications

Windmill Oven Cleaner is suitable for use in **commercial kitchens, bakeries, food production areas and catering environments**. It is ideal for cleaning **ovens, grills and areas with heavy grease and food build-up**, where strong cleaning action is required. Its clinging formulation makes it particularly effective on vertical and hard-to-reach surfaces.

## Cleaning Guide (Typical Contact Times)

- **Light Grease:** 3 mins (cold) / 1 min (warm)
- **Heavy Grease:** 30 mins (cold) / 5 mins (warm)
- **Baked-on Grease:** 12 hours (cold) / 2 hours (warm)
