Windmill Laundry Low Temperature Destainer - 10L

Variant code: 08-858

Windmill Laundry Low Temperature Destainer is a professional laundry additive designed to support effective stain removal in lower temperature wash cycles. Developed as part of Selden's Windmill range, it helps commercial laundry users improve wash performance while supporting more energy-conscious cleaning processes. Its formulation is suitable for use alongside compatible laundry detergents, helping target difficult staining and improve the finished appearance of fabrics in busy, high-throughput environments.

This product is particularly useful where laundry needs to be processed efficiently without relying solely on higher wash temperatures. It supports the removal of common stains found in hospitality, care, healthcare, catering and facilities environments, helping linen, uniforms, towels and other washable textiles maintain a clean and presentable finish. The liquid format allows straightforward dosing into professional laundry systems, making it practical for routine use in commercial cleaning operations.

Product Features

- **Low temperature destaining formula** for professional laundry use
- Designed to enhance stain removal performance during wash cycles
- Suitable for use alongside compatible commercial laundry detergents
- Liquid format for straightforward dosing and handling
- Supports cleaning performance across a wide range of washable fabrics
- Suitable for high-volume laundry environments
- Part of the trusted **Windmill** professional cleaning range

Product Benefits

- Helps improve fabric appearance by targeting visible staining
- Supports effective laundering without unnecessary reliance on high temperatures

- Can help reduce the need for repeat wash cycles when used correctly
- Improves consistency in commercial laundry processes
- Supports operational efficiency in busy laundry environments
- Helps maintain professional standards for linen, towels and workwear
- Suitable for organisations looking to balance cleaning performance with energy-conscious washing

Technical Characteristics

- Use in accordance with manufacturer dosing guidance and site laundry procedures
- Designed for use with suitable professional laundry detergent systems
- Always check fabric care instructions before use on delicate or specialist textiles
- Store securely in a cool, dry location away from direct sunlight
- Ensure staff follow appropriate handling guidance and safety data sheet information
- Best results are achieved when dosing is matched to soil level, water conditions and load type
- Can be integrated into routine commercial laundry processes where destaining support is required

Applications

The **Windmill Laundry Low Temperature Destainer** is suitable for professional laundry environments including hotels, care homes, healthcare support facilities, catering operations, contract cleaners and on-premise laundries. It is particularly appropriate for laundering towels, bed linen, uniforms, kitchen textiles and other washable fabrics where stain removal and presentation are important. Its low temperature performance makes it a practical choice for sites aiming to maintain cleaning standards while supporting efficient laundry operation.
