

Windmill Odour Fresh Cherry – Bactericidal Deodoriser – Atomiser Spray – 300ml – Windmill Refill

Variant code: 14-650

Windmill Odour Fresh Cherry – Bactericidal Deodoriser – Atomiser Spray – 300ml – Windmill Refill is a bactericidal deodoriser designed to deliver **effective odour control and hygienic freshness** using advanced spray technology. As part of the Windmill Refill system, it combines proven deodorising performance with a **next-generation atomiser delivery system**, providing a superior alternative to traditional aerosol products. The formulation eliminates odours at source while leaving a consistent cherry fragrance across treated areas.

Windmill refillable atomisers deliver a **better-than-aerosol spray quality**, offering a fine, even mist that improves coverage and user experience. Unlike conventional aerosols, this system uses **trigger-based dispensing technology**, removing the need for propellant gases and pressurised containers. This not only enhances safety and control but also ensures a more consistent spray output from start to finish.

The product is completely isolated within the container, maintaining formulation integrity and ensuring a reliable performance with every use. Its **continuous spray functionality** allows for quick and even application across large areas, making it suitable for both targeted odour removal and general air freshening. The fine mist ensures efficient distribution without oversaturation of surfaces.

Supplied in a **300ml refill format**, it is designed for use with Windmill atomiser systems, supporting reduced waste and improved sustainability while maintaining high performance in professional cleaning environments.

Product Features

- Bactericidal deodoriser with **cherry fragrance**
- Advanced **atomiser spray technology**
- Produces a **fine, even mist for superior coverage**

- Continuous spray functionality for efficient application
- Trigger-based system with **no propellant gases**
- Isolated product system for consistent performance
- Designed for use with **Windmill refillable atomisers**

Product Benefits

- Delivers **consistent and controlled spray performance**
- Improves coverage while reducing product waste
- Eliminates odours effectively at source
- Enhances user safety by avoiding pressurised aerosols
- Provides a pleasant and long-lasting fragrance
- Supports sustainable cleaning practices

Technical Characteristics

- Compatible with **Windmill atomiser spray systems**
- Utilises **non-pressurised trigger dispensing technology**
- Produces a continuous fine mist spray
- Designed for refill and reuse applications
- Suitable for controlled and targeted application
- Requires use in accordance with manufacturer guidelines

Applications

Windmill Odour Fresh Cherry Atomiser Spray is suitable for **commercial, industrial and public environments**, including washrooms, offices, hospitality venues and healthcare settings. It is ideal for areas requiring **quick and effective odour control**, where even coverage and controlled application are important. The atomiser system makes it particularly suitable for **large spaces and high-traffic environments**, ensuring consistent fragrance distribution and improved overall air quality.

Property	Value
Dilution	Use Neat
Fragrance	Cherry

Property	Value
pH	6.5
Volume (ml)	300
Area of Use	Air freshener
CLP	irritant
How to Use	Spray into the air
Chemical Colour	Red
Food Safe	No
General Deodorising	Dilute from 20-60ml up to neat for extreme deodorising – can be used in a mop and bucket or spray using a trigger spray or pressure sprayer onto affected areas and allow air to dry.
