Windmill Relay - Extra High 25% Solids Metallised Polish - 5L

Variant code: 03-280

Windmill Relay is a metallised floor polish designed to deliver **high-performance floor protection and a durable, high-gloss finish** in professional cleaning environments. With a **25% solids formulation**, it creates a tough, resilient coating that enhances floor appearance while protecting against scuffing, abrasion and everyday wear. As part of the Windmill professional range, it is developed for consistent performance across commercial and institutional settings.

The advanced metallised formula produces a smooth, even finish that responds well to buffing, allowing floors to maintain a polished, professional appearance over time. It is suitable for use on a wide range of floor types, providing a protective layer that helps extend the life of floor surfaces while simplifying routine maintenance.

Designed for efficient application, Windmill Relay can be layered to achieve the desired level of gloss and protection. Once cured, it forms a durable film that resists marking and supports ongoing cleaning programmes, making it ideal for high-traffic areas where both durability and presentation are essential.

Product Features

- Metallised **floor polish with 25% solids content**
- Provides **high-gloss, professional finish**
- Forms a durable protective coating
- Resistant to scuffing, abrasion and wear
- Suitable for a wide range of floor surfaces
- Responds well to **buffing and maintenance**

Product Benefits

- Enhances floor appearance with a consistent shine
- Extends the lifespan of floor surfaces
- Reduces frequency of reapplication
- Supports efficient maintenance routines
- Maintains a clean and professional environment

- Suitable for high-traffic commercial areas

Technical Characteristics

- Designed for **professional floor care applications**
- Suitable for use on compatible hard floor surfaces
- Can be applied in multiple coats for build-up
- Compatible with standard floor maintenance equipment
- Requires appropriate surface preparation before application
- Use in accordance with manufacturer guidelines

Applications

Windmill Relay is suitable for use in **commercial, industrial and institutional environments**, including offices, schools, hospitals, retail spaces and public buildings. It is particularly effective in high-traffic areas where a combination of **durability, protection and visual appearance** is required. Its ability to maintain a high-gloss finish makes it ideal for environments where presentation is important alongside long-term floor performance.

Property	Value
Dilution	Use Neat
pH	8.7
Fragrance	Slight
Area of Use	Polished Hard Floors (Linoleum, PVC, Rubber, Sealed Wood, Terrazzo and Thermoplastic)
Dosing Chart: 10L Dilution	neat
Dosing Chart: 5L Dilution	neat
How to Use	Apply undiluted to a clean, dry, grease-free floor using a lint-free applicator. Strip old polish with a suitable stripper, rinse well, and allow to dry. Apply a thin coat, let dry for 30 minutes, then apply a second coat.
Chemical Colour	White
