Windmill Stainless Steel Polish - 750ml

Variant code: 06-285

Windmill Stainless Steel Polish is a cleaner and polish designed to deliver **effective cleaning, surface protection and enhanced appearance** for stainless steel surfaces. As part of the Windmill professional cleaning range, it provides a reliable solution for maintaining the finish of stainless steel equipment and fittings in commercial and institutional environments.

The formulation works to remove **fingerprints, smears, grease and light soiling**, restoring surface clarity and leaving a polished, streak-free finish. It also leaves a light protective film that helps resist further marking, making it easier to maintain surfaces between cleaning cycles. This makes it particularly suitable for high-contact stainless steel areas where maintaining appearance is essential.

Designed for ease of use, the product is applied directly to surfaces and wiped to a clean finish using a cloth. Its ready-to-use format ensures consistent results without the need for dilution, supporting efficient cleaning routines. The formulation is suitable for a wide range of stainless steel surfaces, including appliances, fixtures and fittings.

Product Features

- Stainless steel **cleaner and polish in one**
- Removes **fingerprints, grease and smears**
- Leaves a **streak-free polished finish**
- Provides a light protective coating
- Suitable for a wide range of stainless steel surfaces
- Ready-to-use for convenient application

Product Benefits

- Maintains a clean and professional appearance
- Reduces frequency of re-cleaning
- Protects surfaces from further marking
- Simplifies cleaning routines
- Suitable for high-contact environments
- Delivers consistent and reliable results
