Windmill Synergy Multipurpose - Biological Multipurpose Cleaner Water Soluble Sachets - Pack of 150

Variant code: 07-880

Windmill Synergy Multipurpose is a professional **biological multipurpose cleaner** supplied in convenient water-soluble sachets for accurate dosing and consistent cleaning performance. Formulated with advanced biological technology, the cleaner combines effective cleaning agents with beneficial microorganisms that help break down organic matter, delivering powerful cleaning results while supporting environmentally responsible cleaning practices.

Designed for use across a wide range of washable surfaces, the formulation effectively removes everyday dirt, grime and organic residues from floors, walls, fixtures and general touchpoints. The biological action continues working after application, helping maintain cleaner surfaces for longer by breaking down residual contamination. The **water-soluble sachet format** eliminates the need for manual measuring, reducing waste, simplifying chemical handling and ensuring consistent dilution every time.

Suitable for routine cleaning programmes in commercial, educational, healthcare and hospitality environments, Windmill Synergy Multipurpose provides a practical and efficient cleaning solution for facilities seeking to improve hygiene standards while reducing chemical handling complexity. The concentrated sachet system also supports simplified storage and transportation compared to traditional liquid cleaning products.

Product Features

- **Biological multipurpose cleaner** for professional environments
- Supplied in convenient **water-soluble sachets**
- Suitable for a wide range of washable surfaces
- Contains active microorganisms to break down organic residues
- Provides consistent dosing without manual measuring

- Supports routine cleaning and hygiene maintenance programmes
- Supplied in a **pack of 150 sachets**

Product Benefits

- Improves cleaning efficiency through accurate portion control
- Reduces product waste and over-dosing
- Supports cleaner and more hygienic environments
- Simplifies chemical handling and storage requirements
- Helps maintain surfaces through ongoing biological action
- Suitable for a wide variety of professional cleaning applications
- Supports environmentally conscious cleaning programmes

Technical Characteristics

- Biological formulation containing active microorganisms
- Water-soluble sachets dissolve completely during preparation
- Suitable for routine cleaning of compatible hard surfaces
- Designed for commercial and institutional cleaning environments
- Provides consistent dilution with every sachet
- Compact format simplifies storage and transport
- Store in a cool, dry location away from moisture

Applications

Windmill Synergy Multipurpose is ideal for schools, offices, healthcare facilities, hospitality venues, public buildings and facilities management environments where regular cleaning and hygiene maintenance are essential. It can be used on floors, walls, fixtures and general hard surfaces, providing an efficient biological cleaning solution that supports high standards of cleanliness while simplifying chemical dosing and stock management.
