Windmill Synergy Toilet and Urinal Cleaner - Biological Toilet and Urinal Cleaner Water Soluble Sachets - Pack of 150

Variant code: 07-885

Windmill Synergy Toilet & Urinal Cleaner is a **biological toilet and urinal cleaning solution** supplied in convenient **water-soluble sachets** for easy dilution and use. Designed to deliver effective cleaning, odour control and ongoing maintenance, the formulation contains specialised bacteria that help break down organic waste while supporting the performance of modern washroom systems.

The advanced biological formula is particularly effective in **water-saving toilets and urinals**, where the build-up of uric acid crystals can lead to unpleasant odours and blockages. The specialised bacteria help digest organic matter and reduce deposits, supporting cleaner and more efficient washroom facilities. A **fresh cotton fragrance** leaves washrooms smelling clean and fresh after use.

Unlike conventional cleaners, the viscous active formulation clings to surfaces for longer contact time, helping deliver a more thorough and effective clean. The water-soluble sachet format eliminates measuring and handling of concentrated liquids, making preparation quick, simple and consistent across multiple cleaning locations.

Supplied in a **pack of 150 sachets**, Windmill Synergy Toilet & Urinal Cleaner provides a practical and economical solution for contract cleaners, facilities managers, schools, offices, hospitality venues and public washrooms seeking effective biological washroom maintenance.

Product Features

- **Biological toilet and urinal cleaner sachets**
- Contains **specialised bacteria** to break down organic waste
- Helps prevent **uric acid crystal build-up**
- **Fresh cotton fragrance** for lasting

freshness
- Water-soluble sachets for simple preparation
- Viscous formula clings to surfaces for improved cleaning performance

Product Benefits

- **Helps reduce odours and maintain washroom freshness**
- **Supports water-saving toilets and urinals**
- **Reduces the risk of blockages caused by uric acid deposits**
- Provides consistent dilution with pre-measured sachets
- Simplifies cleaning procedures and product handling
- Supports effective ongoing washroom maintenance

Technical Characteristics

- Supplied as **water-soluble sachets**
- Pack quantity: **150 sachets**
- Biological formulation with specialised bacteria
- Suitable for toilets, urinals and associated fittings
- Fresh cotton fragrance
- Simply add one sachet to a bottle and fill with water before use

Applications

Windmill Synergy Toilet & Urinal Cleaner is suitable for **commercial washrooms, schools, offices, hospitality venues, leisure centres, healthcare facilities and public buildings** where effective toilet and urinal maintenance is required. It is particularly beneficial for **water-saving toilet and urinal systems** that are prone to uric acid crystal build-up and associated drainage issues, helping maintain cleaner, fresher and more efficient washroom environments.
