Windmill Synergy Washroom - Biological Washroom Cleaner Water Soluble Sachets - Pack of 150

Variant code: 07-881

Windmill Synergy Washroom Cleaner is a **biological washroom cleaning solution** supplied in convenient **water-soluble sachets** for simple dilution and effective daily cleaning. Developed to clean, deodorise and maintain washroom surfaces, the advanced biological formulation combines powerful cleaning performance with long-lasting odour control, making it ideal for commercial and public washroom environments.

The specialised blend of **microbial cultures and enzymes** continues working after application, helping to break down organic matter and eliminate the source of unpleasant odours rather than simply masking them. This ongoing biological action supports cleaner, fresher washrooms while contributing to improved hygiene standards and reduced maintenance requirements.

The cleaner is suitable for a wide range of washroom surfaces, including sinks, toilets, urinals, tiles, washroom fittings and hard surfaces. Its versatile formulation helps remove everyday dirt, grime and organic residues while leaving behind a fresh, clean fragrance. The water-soluble sachet format ensures accurate dilution every time, eliminating the need for measuring and reducing product waste.

Supplied in a **pack of 150 sachets**, Windmill Synergy Washroom Cleaner provides a practical and cost-effective solution for contract cleaners, facilities managers, schools, offices, hospitality venues and public facilities seeking an environmentally responsible washroom cleaning product.

Product Features

- **Biological washroom cleaner in water-soluble sachets**
- Contains **microbial cultures and enzymes**
- Cleans, deodorises and maintains washroom surfaces
- Helps break down organic matter and
